Brabandere,2023-04-18 This volume gathers research at the intersection of art and the interdisciplinary humanities to
develop an understanding of media assemblages that insist on the generativity of their situatedness within ecologies of
practice These contributions propose media assemblages that enlarge the time and space for co compositions between media
and bodies that reshape subjective perceptual and affective registers of experience Media assemblages include photography
performance criticism curation installation animation collage video and VR as well as archival and somatic practices
Research as a form of practice is a key orientation in this volume since it offers a means of engaging the world making
proposition offered by Isabelle Stengers that practices are specified through irreducible entanglements that cause one to
think feel and hesitate The generative linkages between different disciplinary approaches for engaging research practice
across the arts and humanities are favoured over disciplinary and media based exclusivity When practice is not posed as an
intervention or counterpoint to scholarly research or in opposition to the discursive differences emerge not based on
convention but through the situatedness of emergent insight The goal is thus not to forward a reproducible formula for
knowledge creation but to weave the conditions for utterances both within and in excess of discipline convention and
establishment How can research engender the making of communities between across and in excess of institutional
frameworks through the emergent affinities postures and formats of evolving and inclusive forms of research This volume is a
valuable reference for researchers practitioners within the arts and humanities as it exemplifies both critical and situated
methods for developing interdisciplinary research as a means of transforming the terms of research itself American
