Open Science in Africa Katie Wilson, Rania Mohamed Hassan Baleela, Heila Pienaar, Martie Van Deventer, Dale Peters, 2023-08-30 There is an ongoing transition in the research enterprise towards Open Science OS increasing transparency in researchers collaboration knowledge exchange and how science is organized The Open Access OA movement can be seen as a case study of the challenges that this transition can present For example despite all the advantages of OA and the fact that the concept is exceptionally strong as a principle it is yet to be implemented across all institutions particularly in Africa Even though research productivity from the African continent has increased over the last two decades the global north still dominates the scholarly communication and publication sphere High article processing charges APCs can make it difficult for some African researchers to publish in highly rated and respected academic journals which are critical to their career advancement Fee waivers and discounts are available but eligibility and percentages vary by publisher and predatory publishing presents a challenge to African researchers In addition the exclusion of many African publication sources from the major bibliographic databases such as Scopus and the Web of Science skews and limits bibliometric analysis and influences the outcomes of world university rankings This Research Topic aims to investigate the transition to OS in the African continent This will include researchers and other stakeholders support services policy makers concerns regarding OS as well as the advantages it offers them Moreover the role of new technologies is also of interest in the implementation of OA as it is the knowledge divide between different countries and regions It is also crucial to address what needs to change in the research enterprise to make OS a worthwhile venture practice for most researchers and research role players and how they can cope with the contradictory challenges
