Sciences Du Patrimoine Les:

Sciences du patrimoine (Les) Jean-Pierre Mohen, 1999 D'ordinaire les traditions ne assurent plus la transmission de notre héritage culturel Comment dès lors garantissons nous la survie de ce patrimoine Les sciences jouent cet rôle clé ce sont elles tout d'abord qui permettent d'identifier les techniques et les matériaux utilisés jadis par les artistes ce sont elles qui permettent de comprendre les mécanismes naturels d'altération et de destruction ce sont elles enfin qui aident la sauvegarde et la restauration des œuvres des monuments des restes du passé De l'anthropologie la chimie en passant par l'histoire et la politique Jean Pierre Mohen explore les techniques grâce auxquelles notre modernité assure la pérennité du legs des générations passées Synchrotron Radiation, Cultural Heritage, Biomineralization Catherine Dejoie, Pauline Martinetto, Nobumichi

Tamura, 2024-11-01 Many areas of material science have been transformed by the use of synchrotron radiation X rays including the fields of cultural heritage materials and biomineralization This book presents a selection of contributions that illustrate recent developments and applications of these tools focused either on the main techniques used in the cultural heritage and biomineralization communities or on specific materials studying their intrinsic properties or how they change with time Each chapter can be read alone and each individually demonstrates the intimate links between materials and methods The chapters explore the main principles of synchrotron radiation as well as techniques based on X ray absorption and diffraction and give an overview of how these approaches have developed in recent decades in the field of cultural heritage with specific examples such as ancient ceramics corrosion of iron based materials concrete used in Roman monuments and the biomineralization process in sea urchin spines *Heritage Traces in the Making* Jean

Davallon, 2024-06-06 The world is full of traces of the past ranging from things as different as monuments and factories to farms eco museums landscapes mountaineering and even woven grass bridges These traces must be protected and passed on to future generations Communicational analysis shows that these traces have acquired the status of heritage by becoming communicative beings imbued with a new social life Up until the 1970s and 1980s granting this status was the prerogative of the state New modes then emerged increasingly involving social actors and the publicization of knowledge Today the heritage recognition of these traces also depends on interpretative schemes that circulate in society notably through the media *Heritage Traces in the Making* is aimed at anyone researchers professionals and students who is interested in how heritage is created and how it evolves **Spécialité Histoire, Géographie, Géopolitique, Sciences politiques.**
