Abstract- Mention the abstract for the article. An abstract is a brief summary of a research article, thesis, review, conference proceeding or any in-depth analysis of a particular subject or discipline, and is often used to help the reader quickly ascertain the paper's purpose. When used, an abstract always appears at the beginning of a manuscript, acting as the point-of-entry for any given scientific paper or patent application.

Index Terms- About four key words or phrases in alphabetical order, separated by commas. Keywords are used to retrieve documents in an information system such as an online journal or a search engine. (Mention 4-5 keywords)

I. INTRODUCTION

This article guides a stepwise walkthrough by Experts for writing a successful journal or a research paper starting from inception of ideas till their publications. Research papers are highly recognized in scholar fraternity and form a core part of PhD curriculum. Research scholars publish their research work in leading journals to complete their grades. In addition, the published research work also provides a big weight-age to get admissions in reputed varsity. Now, here we enlist the proven steps to publish the research paper in a journal.

Identify the constructs of a Journal – Essentially a journal consists of five major sections. The number of pages may vary depending upon the topic of research work but generally comprises up to 5 to 7 pages. These are:

- 1) Abstract
- 2) Introduction
- 3) Research Elaborations
- 4) Results or Finding
- 5) Conclusions

In Introduction you can mention the introduction about your research.

II. IDENTIFY, RESEARCH AND COLLECT IDEA

It's the foremost preliminary step for proceeding with any research work writing. While doing this go through a complete thought process of your Journal subject and research for it's viability by following means:

- 1) Read already published work in the same field.
- 2) Goggling on the topic of your research work.
- 3) Attend conferences, workshops and symposiums on the same fields or on related counterparts.
- 4) Understand the scientific terms and jargon related to your research work.

III. WRITE DOWN YOUR STUDIES AND FINDINGS

Now it is the time to articulate the research work with ideas gathered in above steps by adopting any of below suitable approaches:

A. Bits and Pieces together

In this approach combine all your researched information in form of a journal or research paper. In this researcher can take the reference of already accomplished work as a starting building block of its paper.

Jump Start

This approach works the best in guidance of fellow researchers. In this the authors continuously receives or asks inputs from their fellows. It enriches the information pool of your paper with expert comments or up gradations. And the researcher feels confident about their work and takes a jump to start the paper writing.

competitive scientific research depends largely on efficient and impactful scientific writing and good publication strategy. Look no further for your guide to the basics. Mitchell P Jones, *Publishing in Science: A Step by Step Guide* is a must have for those new to publishing journal articles, conference papers and book chapters, especially Ph D students. In clear, concise and precise language, Jones lays out the essential steps for compiling a highly scoped and impactful manuscript. Comprehensive and firmly instructional, this guide features step by step directions, content and structure suggestions with useful examples, tips on how to set up and caption effective tables, graphs and schematics and equation and unit formatting principles. Featuring an easy to navigate approach, it also introduces and contrasts each publication type, provides shortcuts for efficient referencing, titling and editing and details what to expect during the publishing process. With no assumed knowledge required, it is the type of investment any writer of scientific papers should make to maximise their chances of success. This guide is specifically formatted for those interested in writing journal articles, conference papers or book chapters. Guides for bachelor's, master's and Ph D theses are also available as part of the *Scientific Writing for Beginners* series.

[Introducing Markdown and Pandoc](#) Thomas Mailund, 2019-08-16. Discover how to write manuscripts in Markdown and translate them with Pandoc into different output formats. You'll use Markdown to annotate text, formatting information with a strong focus on semantic information; you can annotate your text with information about where chapters and sections start, but not how chapter and heading captions should be formatted. As a result, you'll decouple the structure of a text from how it is visualized and make it easier for you to produce different kinds of output. The same text can easily be formatted as HTML, PDF or Word documents with various visual styles by tools that understand the markup annotations. Finally, you'll learn to use Pandoc, a tool for translating between different markup languages such as LaTeX, HTML and Markdown. This book will not describe all the functionality that Pandoc provides, but will teach you how to translate Markdown documents, how to customize your documents using templates and how to extend Pandoc's functionality using filters. If that is something you are interested in, *Introducing Markdown and Pandoc* will get you started. With this set of skills, you'll be able to write more efficiently without worrying about needless formatting and other distractions.
