*Spectrum Sharing in Wireless Networks* John D. Matyjas, Sunil Kumar, Fei Hu, 2016-11-17. Spectrum Sharing in Wireless Networks: Fairness, Efficiency and Security provides a broad overview of wireless network spectrum sharing in seven distinct sections. The first section examines the big picture and basic principles explaining the concepts of spectrum sharing, hardware, software, function requirements for efficient sharing and future trends of sharing strategies. The second section contains more than 10 chapters that discuss differing approaches to efficient spectrum sharing. The authors introduce a new coexistence and sharing scheme for multi-hop networks, describe the space-time sharing concept, introduce LTE-U and examine sharing in broadcast and unicast environments. They then talk about different cooperation strategies to achieve mutual benefits for primary users (PU) and secondary users (SU), discuss protocols in a spectrum sharing context and provide different game theory models between PUs and SUs. The third section explains how to model the interactions of PUs and SUs using an efficient calculation method to determine spectrum availability. Additionally, this section explains how to use scheduling models to achieve efficient SU traffic delivery. The subject of the fourth section is MIMO-oriented design. It focuses on how directional antennas and MIMO antennas greatly enhance wireless network performance. The authors include a few chapters on capacity rate calculations as well as beamforming issues under MIMO antennas. Power control is covered in the fifth section, which also describes the interference-aware power allocation schemes among cognitive radio users and the power control schemes in cognitive radios. The sixth section provides a comprehensive look at security issues, including different types of spectrum sharing attacks and threats as well as corresponding countermeasure schemes. The seventh and final section covers issues pertaining to military applications and examines how the military task protects its data flows when sharing the spectrum with civilian applications.

**Corporate Manslaughter and Corporate Homicide** Shivam Goel, 2015-06-26. A corporation is an artificial legal person existing only in the contemplation of law, having perpetual succession and common seal. Can a corporation commit crime for its inability to form mens rea? If yes, then can it be accused of crimes as grave as homicide? Even post the Bhopal Gas Tragedy and the Uphar Cinema Tragedy, absence of legislation such as the Corporate Manslaughter and Corporate Homicide Act 2007 UK is no less a pity. Absolute liability theory coupled with deep pocket theory though is an improvisation over the strict liability.
