changes and variations of the earth system during the instrumental climate record is far from unequivocal This book develops a framework from which a Global Climate Observing System currently being discussed in international forums can be implemented to monitor changes and variations of climate Audience Administrators policy makers professionals graduate students and others interested in learning how we can ensure a long term climate record for application to national economic development and understanding ecosystem dynamics *Advancing Science in Support of Sustainable Bio-Innovation: 16th ISBR Symposium* Karen Hokanson, Detlef Bartsch, Andrew F.
