EU Competition Law, Data Protection and Online Platforms: Data as Essential Facility Inge Graef, 2016-10-17 All are agreed that the digital economy contributes to a dynamic evolution of markets and competition Nonetheless concerns are increasingly raised about the market dominance of a few key players Because these companies hold the power to drive rivals out of business regulators have begun to seek scope for competition enforcement in cases where companies claim that withholding data is needed to satisfy customers and cut costs This book is the first focus on how competition law enforcement tools can be applied to refusals of dominant firms to give access data on online platforms such as search engines social networks and e commerce platforms commonly referred to as the gatekeepers of the Internet The question arises whether the denial of a dominant firm to grant competitors access to its data could constitute a refusal to deal and lead to competition law liability under the so called essential facilities doctrine according to which firms need access to shared knowledge in order to be able to compete A possible duty to share data with rivals also brings to the forefront the interaction of competition law with data protection legislation considering that the required information may include personal data of individuals Building on the refusal to deal concept and using a multidisciplinary approach the analysis covers such issues and topics as the following data portability interoperability data as a competitive advantage or entry barrier in digital markets market definition and dominance with respect to data disruptive versus sustaining innovation role of intellectual property regimes economic trade off in essential facilities cases relationship of

competition enforcement with data protection law and data related competition concerns in merger cases The author draws on a wealth of relevant material including EU and US decision making practice case law and policy documents as well as economic and empirical literature on the link between competition and innovation The book concludes with a proposed framework for the application of the essential facilities doctrine to potential forms of abuse of dominance relating to data In addition it makes suggestions as to how data protection interests can be integrated into competition policy An invaluable contribution to ongoing academic and policy discussions about how data related competition concerns should be addressed under competition law the analysis clearly demonstrates how existing competition tools for market definition and assessment of dominance can be applied to online platforms It will be of immeasurable value to the many jurists business persons and academics concerned with this very timely subject

Differentiating the Higher Education System of Ethiopia Adula Bekele Hunde, Ephrem Tekle Yacob, Genene Abebe Tadesse, Kiros Guesh, Mekasha Kassaye Gobaw, Nigussie Dechassa, Tesfaye Muhiye Endris, Tesfaye Negewo, Yemataw Wondie, 2023-01-04 The Government of the Federal Democratic Republic of Ethiopia commissioned a national study to review the overall education system of Ethiopia in 2016 that resulted in the Education and Training Roadmap outlining the unwavering commitment towards transformative changes in the national education system Among the various areas identified in the Roadmap for further intervention and urgent policy shift was the dire need to differentiate the public universities which for ages have stagnated from disciplinary and mission redundancy and transform them to vibrant 21st century dynamic universities endowed with missions commensurate with the critical needs of the country

State Capitalism Joshua Kurlantzick, 2016 The end of the Cold War ushered in an age of American triumphalism best characterized by the Washington Consensus the idea that free markets democratic institutions limitations on government involvement in the economy and the rule of law were the foundations of prosperity and stability The last fifteen years starting with the Asian financial crisis have seen the gradual erosion of that consensus Many commentators have pointed to the emergence of a powerful new rival model state capitalism In state capitalist regimes the government typically owns firms in strategic industries Not beholden to private sector shareholders such firms are allowed to operate with razor thin margins if the state deems them strategically important China soon to be the world's largest economy is the best known state capitalist regime but it is hardly the only one In *State Capitalism* Joshua Kurlantzick ranges across the world China Thailand Brazil Russia South Africa Turkey and more and argues that the increase in state capitalism across the globe has on balance contributed to a decline in democracy He isolates some of the reasons for state capitalism's resurgence the fact that globalization favors economies of scale in the most critical industries and the widespread rejection of the Washington Consensus in the face of the problems that have plagued the world economy in recent years That said a number of democratic nations have embraced state capitalism and in those regimes state backed firms like Brazil's Embraer have enjoyed considerable success Kurlantzick highlights the mixed record and the evolving nature of the model yet he is more

concerned about the negative effects of state capitalism When states control firms whether in democratic or authoritarian regimes the government increases its advantage over the rest of society The combination of new technologies the perceived failures of liberal economics and democracy in many developing nations the rise of modern kinds of authoritarians and the success of some of the best known state capitalists have created an era ripe for state intervention State Capitalism offers the sharpest analysis yet of what state capitalism's emergence means for democratic politics around the world **The Pluralist**

Character of the European Economic Constitution Clemens Kaupa,2016-08-25 This monograph intervenes in the long standing and controversial debate on the socio economic orientation of the European Union Arguing that the European economic constitution is pluralist in the sense that it does not favour any specific socio economic paradigm it shows that European law allows the pursuit of very different regulatory projects by the European and the national legislators This pluralist character of the European economic constitution stands in an uncomfortable relationship with the policies currently pursued by the European Union which are often neoliberal in their orientation The book takes an interdisciplinary approach it analyses the Treaty on the Functioning of the European Union as interpreted and developed in the case law of the Court of Justice its history and its regulatory purpose in the light of conflicting socio economic paradigms By challenging the orthodoxy the book makes a bold proposition that will likely resonate in both European economic law scholarship and European law in general With the ongoing economic crisis triggering a significant interest in economic questions among legal scholars it is particularly timely and topical Emissions Trading Schemes under International Economic Law James

Munro,2018-08-09 The announcement by China that it will implement a national emissions trading scheme confirms the status of this instrument as the pre eminent policy choice for mitigating climate change China will join the dozens of existing and emerging schemes around the world from the EU to California South Korea to New Zealand that use carbon units otherwise known as emissions permits or carbon credits to trade in greenhouse gas emissions in a multi billion dollar global carbon market However to date there has been no consensus about this pre eminent policy instrument being regulated by international economic law through the World Trade Organization international investment agreements and free trade agreements Munro addresses this issue by evaluating whether carbon units qualify as goods services financial services and investments under international economic law and showing how international economic law applies to emissions trading scheme in diverse and unexpected ways Further by engaging in a comparative assessment of schemes around the world his book illustrates how and why all emissions trading schemes engage in various forms of violations of international economic law which would not in most instances be justified by environmental or other exceptions In doing so he demonstrates how such schemes can be designed or reformed in ways to ensure their future compliance **STAIRS 2014** U. Endriss,J.

Leite,2014-08 Artificial Intelligence is a field which continues to expand and develop rapidly and so it is also one in which original ideas and fresh perspectives are of particular interest The Starting AI Researcher Symposium STAIRS is an

international meeting which supports Ph D students and those who have held a Ph D for less than one year from all over the world at the start of their career The symposium offers doctoral students and young postdoctoral AI fellows the chance to experience delivering a presentation of their work in a supportive environment This book presents papers from the Seventh STAIRS a satellite event of the 21st European Conference on Artificial Intelligence ECAI held in Prague Czech Republic in August 2014 The book includes 30 papers accepted for presentation at the conference out of 45 submissions 16 papers were selected for an oral presentation at the symposium while the other 14 were presented at a poster session Together these papers cover the field of AI knowledge representation and reasoning machine learning planning and scheduling being the areas which have attracted the largest number of submissions The book provides a fascinating preview of the current work of future AI researchers and will be of interest to all those whose work involves the use of artificial intelligence and intelligent systems

Chinese Merger Control Law Tingting Weinreich-Zhao,2014-11-19 On 1 August 2008 the Chinese Anti Monopoly Law entered into force introducing a comprehensive framework for competition law to the Chinese market One set of the new rules pertains to merger control China s Ministry of Commerce MOFCOM was nominated as the authority responsible for enforcing merger control in China and has been actively doing so ever since Recent years have established China as one of the most important merger filing jurisdictions for cross border mergers alongside the EU and USA This work evaluates the Chinese merger control law regime and MOFCOM s decision making practice after more than five years of application In particular it assesses which policy goals competition policy goals or industrial policy considerations prevail in the written law and its application and provides suggestions for a further improvement of the law with the aim to develop a transparent merger control regime that promotes long term economic growth in China

Monetary Policy in India Chetan Ghate,Kenneth M. Kletzer,2016-11-25 This book presents research that applies contemporary monetary theory and state of the art econometric methods to the analysis of the monetary and financial aspects of the Indian economy and the impact of monetary policy on economic performance Indian monetary policy has attracted significant attention from Indian and international macroeconomists over the last several years Interest in how monetary policy influences economic performance and how monetary policy is conducted in India is growing The prospects for further financial sector reform and ongoing inflation in India have sparked new interest in the role of money and monetary policy in India among economists policy makers and students alike The book should also interest economists outside India because it studies monetary economics in a major emerging market economy and makes advances in the analysis of how financial market imperfections and structural constraints influence the effects of monetary policy

Practising Virtue David D. Caron, Stephan W. Schill, Abby Cohen Smutny, Epaminontas E. Triantafilou, 2015-11-12 International arbitration has developed into a global system of adjudication dealing with disputes arising from a variety of legal relationships between states between private commercial actors and between private and public entities It operates to a large extent according to its own rules and dynamics a transnational justice system rather independent of domestic and international law In response to its growing importance and use by disputing parties international arbitration has become increasingly institutionalized professionalized and judicialized At the same time it has gained significance beyond specific disputes and indeed contributes to the shaping of law Arbitrators have therefore become not only adjudicators but transnational lawmakers This has raised concerns over the legitimacy of international arbitration *Practising Virtue* looks at international arbitration from the inside with an emphasis on its transnational character Instead of concentrating on the national and international law governing international arbitration it focuses on those who practise international arbitration in order to understand how it actually works what its sources of authority are and what demands of legitimacy it must meet Putting those who practise arbitration into the centre of the system of international arbitration allows us to appreciate the way in which they contribute to the development of the law they apply This book invites eminent arbitrators to reflect on the actual practice of international arbitration and its

contribution to the transnational justice system **Advancing the Frontiers of Heterodox Economics** Tae-Hee Jo, Zdravka Todorova, 2015-07-30 This collection of essays honors the life and work of one of the most prominent and fervent heterodox economists Frederic S Lee who has been at the heart of the heterodox economics movements for the past three decades Authors in this book demonstrate that heterodox economic has transcended the criticism of mainstream economics and more importantly that constructive developments are in the making by way of cross communications among various heterodox economics traditions Frederic S Lee s contributions to heterodox economics are centered on three themes the making of a history and identity of heterodox economics heterodox microeconomics and the heterodox analysis of social provisioning Part I addresses the importance of history theory research methods and institutions in the making of the identity of heterodox economics as an alternative to mainstream economics Part II delves into heterodox microeconomic theories in particular investment pricing competition markets and market governance as foundations of heterodox macroeconomic analyses Part III expands the analysis of the capitalist social provisioning process with an emphasis on its subsystems and their relationships over historical time Part IV encapsulates the life and work of Frederic S Lee Throughout his intellectual life Frederic S Lee has shown to many that the development of heterodox economics is rendered possible by unselfish and ceaseless efforts to build both theory and institutions Essays in this book attest that establishing an alternative critical theory to the status quo is not only possible but also serviceable to the majority of the population **Just Security in an Undergoverned World** William Durch, Joris Larik, Richard Ponzio, 2018-01-19 Just Security in an Undergoverned World examines how humankind can manage global problems to achieve both security and justice in an age of antithesis Global connectivity is increasing visibly and invisibly in trade finance culture and information helping to spur economic growth technological advance and greater understanding and freedom but global disconnects are growing as well Ubiquitous electronics rely on high value minerals scraped from the earth by miners kept poor by corruption and war People abandon burning states for the often indifferent welcome of wealthier lands whose people in turn draw into themselves Humanity s very success underwritten in large part by lighting up gigatons of long buried carbon for 200 years now threatens humanity s future The global governance institutions established after World War II to manage global threats especially the twin scourges of war and poverty have expanded in reach and impact while paradoxically losing the political support of some of their wealthiest and most powerful members Their problems mimic those of their members in struggling to adapt to new problems and maintain trust in norms and public bodies This volume argues however that a properly mandated managed and modernized global architecture offers unparalleled potential to midwife solutions to intractable issues from violent conflict and climate change to poverty and pandemic disease that transcend borders and the capacities of individual actors It offers just security as a new framework for charting innovating solutions and strategies for effective and essential global governance

Handbook Of International Food And Agricultural Policies (In 3 Volumes) , 2017-11-28 Handbook of International

Food and Agricultural Policies is a three volume set that aims to provide an accessible reference for those interested in the aims and implementation of food and farm policies throughout the world. The treatment is authoritative, comprehensive and forward looking. The three volumes combine scholarship and pragmatism relating academic writing to real world issues faced by policy makers. A companion volume looking at the future resource and climate challenges for global agriculture will be published in the future. Volume I covers Farm and Rural Development policies of developed and developing countries. The volume contains 20 country chapters together with a concluding comprehensive synthesis of lessons to be drawn from the experiences of the individual countries. Volume II examines the experience of countries with food policies including those dealing with food safety and quality and the responsibility for food security in developing countries. The chapters address issues such as obesity, nutritional supplements, organic foods, food assistance programs, biotech, food acceptance and the place of private standards. Volume III describes and explains the international trade dimension of farm and food policies both at the bilateral and regional level and also the multilateral rules that influence and constrain individual governments. The volume also looks at the steps that countries are together taking to meet the needs of developing and low income countries. The volumes are of value to students and researchers interested in economic development, agricultural markets and food systems. Policy makers and professionals involved in monitoring and regulating agricultural and food markets would also find the volumes useful in their practical work. This three volume set is also a suitable source for the general public interested in how their food system is influenced by government policies.

Antitrust between EU Law and national law/Antitrust fra diritto nazionale e diritto dell'unione europea Enrico Adriano Raffaelli, 2019-09-09. This work contains the papers of the thirteenth Conference on Antitrust between EU Law and national law held in Treviso on May 24 and 25, 2018, under the patronage of the European Lawyers Union, Union des Avocats Européens, UAE, the Associazione Italiana per la Tutela della Concorrenza, the Italian section of the Ligue Internationale du Droit de la Concurrence, LIDC, the Associazione Italiana Giuristi di Impresa, AIGI, the European Company Lawyers Association, ECLA, and the Associazione Antitrust Italiana, AAI. Some of the papers have been extensively reviewed and updated by the authors prior to publication. The contributions contained in this volume are the result of an in-depth analysis and study of the most salient issues arising from the application of antitrust rules carried out by experienced and high-ranking professionals in-house lawyers, academics, and EU national and international institutional representatives who attended the Conference. They deal with extremely topical issues lying at the heart of current antitrust debate. Some of the most contemporary topics include those related to private antitrust enforcement after the implementation of Directive 2014/104/EU and to the interplay between antitrust and intellectual property rights. Ample consideration is also given to recent developments in the field of new technologies and the related antitrust issues as well as to the relations between consumer protection and antitrust.
