**Defining Identity and the Changing Scope of Culture in the Digital Age** Novak, Alison, El-Burki, Imaani Jamillah, 2016-05-19 Since the popularization of Internet technologies in the mid 1990s human identity and collective culture has been dramatically shaped by our continued use of digital communication platforms and engagement with the digital world. Despite a plethora of scholarship on digital technology, questions remain regarding how these technologies impact personal identity and perceptions of global culture. *Defining Identity and the Changing Scope of Culture in the Digital Age* explores a multitude of topics pertaining to selfhood, self-expression, human interaction, and perceptions of civilization and culture in an age where technology has become integrated into every facet of our everyday lives. Highlighting issues of race, ethnicity, and gender in digital culture, interpersonal and computer-mediated communication, pop culture, social media, and the digitization of knowledge, this pivotal reference publication is designed for use by scholars, psychologists, sociologists, and graduate-level students interested in the fluid and rapidly evolving norms of identity and culture through digital media.

**Healthy Teens, Healthy Schools** Vanessa Domine, 2015-05-21 Widespread obesity, poor nutrition, sleep deprivation, and highly digital and sedentary lifestyles are just a few of the many challenges facing young people. Although public schools in the United States have the potential for meeting these challenges on a mass scale, they are slow to respond. The emphasis on discrete subject areas and standardized test performance offers little in the way of authentic learning and may in reality impede health. *Healthy Teens, Healthy Schools* How Media Literacy Education can Renew Education in the United States reframes health education as a complex terrain that resides within a larger ecosystem of historical, social, political, and global economic forces. It calls for a media-literate pedagogy that empowers students to be critical consumers, creative producers, and responsible citizens. This book illustrates holistic health education through school, community initiatives, and innovative partnerships that are successful in magnifying all curriculum subjects and their associated teaching practices. Vanessa Domine offers teachers, teacher educators, school administrators, community organizers, public health professionals, and policy makers with a transmedia and transdisciplinary educational approach to adolescent health to demonstrate how our collective focus on cultivating healthy teens will ultimately yield healthy schools.
