Platnick, W. David Sissom, 1997 This unique and timely publication is the first such Catalog to be produced in over 100 years The last full survey of the taxonomy of the world fauna of the Order Scorpiones was by Karl Kraepelin in 1899 *Scorpiones und Pedipalpi Das Tierreich* Herausgegeben von der Deutschen Zoologischen Gesellschaft Berlin Since then the sheer number of known species and subspecies has increased more than fourfold and the classification of scorpions has been greatly transformed at both the generic and familial levels This new Catalog brings together under one cover an enormous amount of difficult to locate information on scorpion nomenclature biogeography distribution and phylogeny published before and after Kraepelin's time It is of special interest because of the unique status that scorpions currently enjoy as models for the study of evolutionary biology ecology toxicology and physiology The Catalog is much more than a checklist it is an annotated organized compendium of the status of the entire field of Scorpion Taxonomy at the beginning of the New Millennium by authoritative and critical researchers working in the field The authors have coordinated and collaborated extensively to make this a fully integrated work The utility of the Catalog is enormously enhanced by the inclusion of much greater detail than other animal catalogs including type data tracing of full synonymies of all names clarification or critical discussion of known nomenclatural problems comprehensive cross index and notes on biogeography and phylogeny **Zoogeography of Arachnida** Petar Beron, 2018-07-27 This volume merges all geographical and paleogeographical data on all groups of the arachnofauna The book features topics such as the ecological factors climate and other barriers that influence the distribution of arachnida It also elaborates on the characteristics of the distribution such as arachnida at high altitude e.g. Himalaya in caves in polar regions and highlights differences between the arachnofauna of e.g. Mediterranean regions vs Central Europe West African vs Indomalayan and more Furthermore amongst other topics the volume also includes chapters on the systems of arachnida fossil orders dispersal and dispersion endemics and relicts regional arachnogeography cave and high altitude arachnida African Biodiversity Bernhard A. Huber, Bradley J. was to focus on Africa rather than on a particular taxon and to highlight biodiversity at all levels ranging from molecules to ecosystems This focus was timely partly because of the currently running BIOTA Africa programmes BIOdiversity Monitoring Transect Analysis in Africa BIOTA is an interdisciplinary research project focusing on sustainable use and conservation of biodiversity in Africa <http://www.biotafrica.de> Session titles were Biogeography and Speciation Processes Phylogenetic Patterns and Systematics Diversity Declines and Conservation and Applied Biodiversity Informatics Each session was opened by an invited speaker and all together 77 lectures and 59 posters were presented There were over 200 participants and it was gratifying to us to meet colleagues from 26 nations including Russia Ukraine Japan USA and ten African countries We thank all participants for their valuable contributions
