Reinterpreting Property Margaret Jane Radin,2009-04-03 This collection of essays by one of the country s leading property theorists revitalizes the liberal personality theory of property Departing from traditional libertarian and economic theories of property Margaret Jane Radin argues that the law should take into account nonmonetary personal value attached to property and that some things such as bodily integrity are so personal they should not be considered property at all Gathered here are pieces ranging from Radin s classic early essay on property and personhood to her recent works on governmental taking of private property Margaret Jane Radin is professor of law at Stanford University She is the author of over twenty five articles on legal and political theory *Elementary Mathematics Curriculum Materials* Janine T. Remillard,Ok-Kyeong Kim,2020-03-16 The book presents comparative analyses of five elementary mathematics curriculum programs used in the U S from three different perspectives the mathematical emphasis the pedagogical approaches and how authors communicate with teachers These perspectives comprise a framework for examining what curriculum materials are comprised of what is involved in reading and interpreting them and how curriculum authors can and do support teachers in this process Although the focus of the analysis is 5 programs used at a particular point in time this framework extends beyond these specific programs and illuminates the complexity of curriculum materials and their role in teaching in general Our analysis of the mathematical emphasis considers how the mathematics content is presented in each program in terms of sequencing the nature of mathematical tasks cognitive demand and ongoing practice and the way representations are used Our analysis of the pedagogical approach examines explicit and implicit messages about how students should interact with mathematics one another the teacher and the textbook around these mathematical ideas as well as the role of the teacher In order to examine how curriculum authors support teachers we analyze how they communicate with teachers and what they communicate about including the underlying mathematics noticing student thinking and rationale for design elements The volume includes a chapter on curriculum design decisions based on interviews with curriculum authors Applied Mechanics Reviews ,1976 **Review of Marketing 1981** Ben M. Weird Ideas That Work Robert I. Sutton, 2002-03-02 A breakthrough in management thinking weird ideas can help every organization achieve a balance between sustaining performance and fostering new ideas To succeed you need to be both conventional and counterintuitive Creativity new ideas innovation in any age they are keys to success Yet as Stanford professor Robert Sutton explains the standard rules of business behavior and management are precisely the opposite of what it takes to build an innovative company We are told to hire people who will fit in to train them extensively and to work to instill a corporate culture in every employee In fact in order to foster creativity we should hire misfits goad them to fight and pay them to defy convention and undermine the prevailing culture Weird Ideas That Work codifies these and other proven counterintuitive ideas to help you turn your workplace from staid and safe to wild and woolly and creative In Weird Ideas That Work Sutton draws on extensive research in behavioral psychology to explain how innovation can be fostered in hiring managing and motivating people building teams making decisions and interacting with outsiders Business practices like hire people who make you uncomfortable and reward success and failure but punish inaction strike many managers as strange or even downright wrong Yet Weird Ideas That Work shows how some of the best teams and companies use these and other counterintuitive practices to crank out new ideas and it demonstrates that every company can reap sales and profits from such creativity Weird Ideas That Work is filled with examples drawn from hi and low tech industries manufacturing and services information and products More than just a set of bizarre suggestions it represents a breakthrough in management thinking Sutton shows that the practices we need to sustain performance are in constant tension with those that foster new ideas The trick is to choose the right balance between conventional and weird and now
