**Voters and Voting in Context** Christof Wolf, 2017-10-27 *Voters and Voting in Context* investigates the role of context in affecting political opinion formation and voting behaviour. Building on a model of contextual effects on individual level voter behaviour the chapters of this volume explore contextual effects in Germany in the early twenty first century. The volume draws upon manifold combinations of individual and contextual information gathered in the German Longitudinal Election Study ( GLES ) framework and employ advanced methods. In substantive terms it investigates the impact of campaign communication on political learning effects of media coverage on the perceived importance of political problems and the role of electoral competition on candidate strategies and perceptions. It also examines the role of social and economic contexts as well as parties' policy stances in affecting electoral turnout. The volume explores the impact of social cues on candidate voting effects of electoral arenas on vote functions the role of media coverage on ideological voting and effects of campaign communication on the timing of electoral decision making. *Voters and Voting in Context* demonstrates the key role of the processes of communication and politicization in bringing about contextual effects. Context thus plays a nuanced role in voting behaviour. The contingency of contextual effects suggests that they will become an important topic in research on political behaviour and democratic politics.

The Young Voter John J. Patrick, Allen D. Glenn, 1972    Teaching Social Studies in an Age of Crisis National Council for the Social Studies, 1971    Resources in Education, 1994-07    Annual Review of Political Science, 2007 The mission of Annual review of political science is to provide systematic periodic examinations of the field through critical authoritative reviews. The comprehensive critical review not only summarizes a topic but also roots out errors of fact or concept and provokes discussion that will lead to new research activity. Each review contains title, author's key words, abstracts, review and bibliography.

*The Social Psychology of Politics* Victor C. Ottati, R. Scott Tindale, John Edwards, Fred B. Bryant, Linda Heath, Yolanda Suarez-Balcazar, Emil J. Posavac, 2012-12-06 Early studies of political behavior examined the sociological, attitudinal and rational determinants of political behavior. However, none of these approaches provided a descriptive model of how people process political information and make political decisions under naturalistic conditions that involve limited cognitive capacity and motivation. Fortunately, contemporary approaches within the field of political psychology have begun to address these concerns. Inspired by recent advances in the area of social psychology, researchers are rapidly developing more realistic and detailed models of the psychological process that determines political

judgements and behavior Early attempts to merely predict political behavior have been replaced by an attempt to describe the actual process whereby individuals gather interpret exchange and combine information to arrive at a political judgement or decision This volume provides comprehensive coverage of this pioneering era of research in political psychology
