entire police department lead by detectives Steven Logan and Raymond Gage scour the city in search of a maniacal savage. When all tips and leads have been exhausted they review all evidence. They come back to the thread. The only real evidence. With tenacity and perseverance of Logan and Gage the killer is apprehended. The reader experiences the twists and turns of the investigation and ultimately occupies a reserved seat in the Superior Court as the trial proceedings commence. *A Thread of Evidence* has been written as fiction but inspired by an actual event. Fifty years later it remains etched in the minds of all who had lived in the area. The author has researched court records, newspapers, interviewed neighbors, police, and has drawn on personal recollections of the crime. The story has been recounted over and over and to this day it continues to be discussed. *A Thread of Evidence* is a compelling account of superb detective work and unprecedented dedication of an entire police department.

*Multisite Evaluation Practice: Lessons and Reflections From Four Cases* Frances Lawrenz, 2011-04-19

Multisite evaluation settings differ from the single settings common to research on evaluation use. In addition to the primary intended users, there is another important group of potential evaluation users in settings where government agencies or large national or international foundations fund multisite projects: project leaders and local evaluators. If each project site is expected to take part in or support the overall program evaluation, then these individuals frequently serve as links between their projects and the larger cross-project evaluation of the funded program. The field has not until now addressed the topic of how being asked or required to participate in such evaluations affects these people who play a critical role in multisite evaluations. This issue does so in two ways. The first six chapters present data and related analyses from research on four multisite evaluations documenting the patterns of involvement in these evaluation projects and the extent to which different levels of involvement in program evaluations resulted in different patterns of evaluation use and influence. The remaining chapters offer reflections on the results of the cases or their implications, some by people who were part of the original research and some by those who were not. The goal is to encourage readers to think actively about ways to improve multisite evaluation practice. This is the 129th volume of the Jossey-Bass quarterly report series *New Directions for Evaluation*, an official publication of the American Evaluation Association.
