Student Exploration: Electron Configuration

Vocabulary: atomic number, atomic radius, Aufbau principle, chemical family, diagonal rule, electron configuration, Hund's rule, orbital, Pauli exclusion principle, period, shell, spin, subshell

Game Warm-up

Just like passengers getting on a bus, electrons orbit the nuclei of atoms in particular patterns. You will discover these patterns (and how electrons sometimes act like passengers boarding a bus) with the *Electron Configuration Gizmo™*.

To begin, check that **Lithium** is selected on the PERIODIC TABLE tab.

1. The **atomic number** is equal to the number of protons in an atom.

How many protons are in a lithium atom? **3**

2. A neutral atom has the same number of electrons and protons.

How many electrons are in a neutral lithium atom? 3

3. Select the **ELECTRON CONFIGURATION** tab. Click twice in the **1s** box at upper left and once in the **2s** box. Observe the atom model on the right.

- A. What do you see? I see 2 electrons in the first shell and 1 in the second orbiting the nucleus.
- B. Click Check. Is this electron configuration correct? Yes, the electron configuration is correct.

Activity A:
 Small atoms

Get the Gizmo ready:
 ● On the PERIODIC TABLE tab, select **H** (hydrogen).
 ● Select the ELECTRON CONFIGURATION tab.
 ● Click **Reset**.

Introduction: Electrons are arranged in **orbitals**, **subshells**, and **shells**. These levels of organization are shown by the boxes of the Gizmo. Each box represents an orbital. The subshells are labeled with letters (*s*, *p*, *d*, and *f*) and the shells are labeled with numbers.

Question: How are electrons arranged in elements with atomic numbers 1 through 10?

1. **Infer:** Based on its atomic number, how many electrons does a hydrogen atom have? **1**

Challenging e-Learning in the University Robin Goodfellow, Mary Lea, 2007-10-16 Informed by an intimate knowledge of a social literacies perspective this book is full of profound insights and unexpected connections Its scholarly clear eyed analysis of the role of new media in higher education sets the agenda for e learning research in the twenty first century Ilana Snyder Monash University This book offers a radical rethinking of e learning The authors challenge teachers course developers and policy makers to see e learning environments as textual practices rooted deeply in the social and intellectual life of academic disciplines This approach holds great promise for moving e learning past its focus on technology and the learner toward vital engagement with fields of inquiry through texts Professor David Russell Iowa State University *Challenging e learning in the University* takes a new approach to the growing field of e learning in higher education In it the authors argue that in order to develop e learning in the university we need to understand the texts and practices that are involved in learning and teaching using online and web based technologies The book develops an approach which draws together social and cultural approaches to literacies learning and technologies illustrating these in practice through the exploration of case studies It is key reading for educational developers who are concerned with the promises offered but rarely delivered with each new iteration of learning with technologies It will also be of interest to literacies researchers and to HE policy makers and managers who wish to understand the contexts of e learning

From Gutenberg to the Internet Jeremy M. Norman, 2005 *From Gutenberg to the Internet* presents 63 original readings from the history of computing networking and telecommunications arranged thematically by chapters Most of the readings record basic discoveries from the 1830s through the 1960s that laid the foundation of the world of digital information in which we live These readings some of which are illustrated trace historic steps from the early nineteenth century development of telegraph systems the first data networks through the development of the earliest general purpose programmable computers and the earliest software to the foundation in 1969 of ARPANET the first national computer network that eventually became the Internet The readings will allow you to review early developments and ideas in the history of information technology that eventually led to the convergence of computing data networking and telecommunications in the Internet The editor has written a lengthy illustrated historical introduction concerning the impact of the Internet on book culture It compares and contrasts the transition from manuscript to print initiated by Gutenberg s invention of printing by moveable type in the 15th century with the transition that began in the mid 19th century from a print centric world to the present world in which printing co exists with various electronic media that converged to form the Internet He also provided a comprehensive and wide ranging annotated timeline covering selected developments in the history of information technology from the year 100 up to 2004 and supplied introductory notes to each reading Some introductory notes contain supplementary illustrations

Mobile, Ubiquitous, and Pervasive Learning Alejandro Peña Ayala, 2015-12-12 This book is concerned with the mobile ubiquitous

and pervasive learning arena It present a collection of works corresponding to four categories reviews studies conceptual proposals and approaches As a result of the submission and revision processes eight manuscripts were accepted and organized into the aforementioned four parts as follows Review a couple of chapters offer a survey of related works One concerns with the diversity of mobile ubiquitous and pervasive labor where interested findings are unveiled based on correlations Other focuses on adaptive and adaptable architectures that are suitable to implement ubiquitous learning sceneries whose contribution represents a model of a domain specific architecture Studies two chapters explore issues related to the effect of question styles made through smartphones and tablets and the disposition of teachers to exploit mobile devices at classroom Conceptual a pair of chapters offer a given proposal the first to develop adaptive mobile learning systems by means of a framework based on contextual information and the second with the purpose to share some guidelines of how to apply cloud computing in the development and operation of mobile Approaches two chapters apply a specific paradigm as part of a whole application and reveal the achieved impact One of them uses augmented reality to encourage children to learn about trees as context sensitive informal learning The other immerses children in playing a learning game to learn math by cooperating between members team and interacting through mobile devices This volume will be a source of interest for researchers practitioners professors and postgraduate students aimed at updating their knowledge and finding targets for future work in the mobile ubiquitous and pervasive learning field
