Highlighting innovative teaching techniques and real world illustrations of the educational strategies, this text goes beyond theory to offer practical application principles that educators can count on. [Fast Facts for the School Nurse, Second Edition](#) Janice Loschiavo, MA, RN, NJ-CSN, Janice Loschiavo, 2015-03-09 This concise reference resource for school nurses offers straightforward guidelines to a range of daily tasks and nursing responsibilities including clinical protocols for safe management of common childhood illnesses, accidents and emergencies, legal and ethical considerations, documentation, high risk areas in school nursing practice, and the requirements of both the Americans with Disabilities Act and the Individuals with Disabilities Education Act. From publisher description: *Handbook of Clinical Teaching in Nursing and Health Sciences* Marcia Gardner, Patricia Dunphy Supplee, 2010-08-23 Due to the growing nursing faculty shortage, clinicians are being recruited directly from the practice setting for clinical teaching without formal training in educational strategies. *Handbook of Clinical Teaching in Nursing and Health Care* serves as a quick reference for support of clinical teaching for nurses. It allows a clinical instructor to identify a question about clinical teaching and quickly get ideas about how to effectively handle a situation or create the best learning environment within the clinical context.

Augmenting Health and Social Care Students' Clinical Learning Experiences Stephen Billett, Jennifer

Newton, Gary Rogers, Christy Noble, 2019-02-25 This edited volume offers a range of insights about practices of and findings associated with enriching health and social care students' learning by their engagement in educational processes during and after the completion of their practicum experiences in health and social care settings. That is, using post-practicum intervention to augment and enrich those learning experiences. The collected contributions here draw on the processes of trialing and evaluating educational processes that aimed to enrich those practicum experiences for purposes of improving students' understandings, abilities to address patients' needs, and health and social care related dispositions. These processes and findings from these processes across medical nursing, midwifery, physiotherapy, pharmacy, exercise physiology, dietetic, and speech pathology education speak directly to educators in both clinical and educational settings in the health and social care sectors. These messages, which arise from educators and clinicians enacting and evaluating these interventions, offer practical suggestions as well as conceptual advances. The reach of the accounts of processes, findings, and evaluations is not restricted to this sector alone; however, the lessons provided through this edited volume are intended to inform how post

practicum interventions might be enacted across a range of occupational fields
