## Student Exploration: 3D Eclipse

**Vocabulary:** eclipse, lunar eclipse, path of totality, penumbra, solar eclipse, umbra

**Prior Knowledge Questions** (Do these BEFORE using the Gizmo.)

1. Have you ever seen an **eclipse**? If so, describe what you saw. It looks like a black circle with white light coming out all around it.
2. About how often do you think eclipses happen? **Solar eclipses happen about 2 to 4 times per year**

### Gizmo Warm-up

If you see a two-dimensional image of the Earth, Moon, and Sun, you might predict that an eclipse occurs every time the Moon passes in front of or behind Earth, or about twice a month. However, eclipses occur much more rarely.

The *3D Eclipse Gizmo™* shows two views of the Earth, Moon, and Sun: a top view (above) and a side view (below). The sizes of the Earth, Moon, and Sun are not to scale. (If they were, the Earth and Moon would be microscopic!)

1. Set the **Simulation speed** slider to a middle value, and click **Play** (▶). Based on the top view on the SIMULATION pane, describe the motions of the Sun, Earth, and Moon.

**The earth spins in a circle while circling the sun, and the moon is circling the earth**

2. Click **Reset** (↺), and then click **Play** again. This time, focus on the side view at the bottom of the SIMULATION pane. What do you notice about the Moon's orbit?

**The moon is going in less of a circular path and more of an oval-ish past.**

# Student Exploration Eclipse
