Student Exploration: Natural Selection

Summary: Biological organisms change over time. Natural selection, genetic drift, and other factors can cause these changes. This exploration focuses on natural selection.

What You Will Learn: You will learn about the process of natural selection and how it can lead to the formation of new species.

The **peppered moth** (*Biston betularia*) is a moth species found in Europe, Asia, and North America. It is a nocturnal moth that lives in trees. In **England**, where the air is filled with soot, the **dark-colored** moths are more common than the **light-colored** moths. Before 1800, the light-colored moths were the most common.

1. Why might the dark-colored moths be better suited to live in England?

Answer: **They are better camouflaged.**

2. Why might the light-colored moths be better suited to live in England?

Answer: **They are better camouflaged.**

What You Will Do:

You will use the **Peppered Moth** simulation to explore how natural selection can lead to the formation of new species. You will observe how the moths change over time and how the environment affects their survival.

How many moths did you start with?

1. How many light-colored moths did you start with? **100**

2. How many dark-colored moths did you start with? **100**

3. How many light-colored moths did you start with? **100**

4. **What happens** when the environment changes? **The moths change color.**

What happens when the environment changes? **The moths change color.**

The light-colored moths.
