

# Setting Student Growth Goals in Physical Education

**1. Content Standards/Skills** - Based on the relevant content and skills students should know or be able to do at the end of the course/class, a clear statement of a specific area of focus is selected. These should be specific state or national standards (a statement such as "Common Core State Standards in Math" is not specific enough).

**Example:** National Standard S1.H1: Demonstrates competency in activity specific movement skills.

Student will demonstrate all of the critical elements for the set shot in basketball

**2. Assessments** - Describes how student learning and growth will be measured. Assessments must be aligned to state or national standards and meet state criteria.

**Example:** Using the Basketball Critical Elements Rubric for the set shot, students will be assessed on their ability to perform all 4 critical elements for the freethrow in 5 shots.

(Criterion 3: Sub-group example—after observing class shoot freethrows, only 1 out of the 10 female students in the class was able to use correct form for shooting, while 17 out of 20 male students were able to use correct form for shooting).

Pretest—All female students will be observed shooting 5 freethrows and analyzed according to the rubric. Record performance \_\_\_\_/5 made.

Formative— All students will conduct peer assessments on each other utilizing the rubric. Record performance \_\_\_\_/5 made.

Posttest— All female students will be observed shooting 5 freethrows and analyzed according to the rubric. Record performance \_\_\_\_/5 made.

**3. Context/Students** - Description of the demographics and learning needs of all students in the class or course. This should include relevant information that could include, but is not limited to: the number of students and their gender, race/ethnicity, socioeconomic status, and any students with diverse learning needs (e.g., EL, IEP, 504 plans). For those educators who do not meet with students on a regular basis, including contact time (e.g., one 50 minute period per day, two 90 minute blocks per week, etc.) provides additional context for the goals developed by the educator. The context will affect the development of your instructional strategies.

**Example:**

"There are currently 30 students enrolled in my 1<sup>st</sup> period Team Sports class; 10 students are female and 20 are male. Five of the students in this class have an IEP and/or 504 plan."

**Coaching Values and Life Skills through Physical Education and Sports** Koon Teck Koh, Tarkington J Newman, Muhammad Shufi Bin Salleh, 2024-11-08. This impactful resource guide is for international educators and practitioners involved in Physical Education and Sport (PES) who want to learn evidence-based approaches to the teaching of values and character education. Through a systematic approach to teaching and evaluating values and character education, this book bridges the gap between theory and practice. It offers empirical evidence and strategies to show how values and character can be internalized through carefully designed experiences, active participation, and regular reinforcement without compromising the time needed to learn sports skills, a common concern raised by PE teachers and sports coaches. Results from case studies have also revealed that values can be transferred beyond the context of physical education lessons and sports through a collaborative approach and effective communication between teachers, coaches, and parents. Key strategies based on empirical evidence are highlighted in this book. It also highlights an Asian perspective on values and life skills training through Physical Education and provides readers with step-by-step implementation guidelines to simplify some complex strategies in developing values and life skills through PES seamlessly. The book provides useful information to anyone engaged in developing young people in and through sport. In particular, it will be of great value to pre-service and in-service teachers and coaches for implementing effective strategies to balance teaching sports skills, values, and life skills effectively in PES.

Advancing Self-Directed Learning in Higher Education Mncube, Dumsani Wilfred, Maphalala, Mncedisi Christian, 2023-05-01. Self-directed learning (SDL) is considered a core concept in problem-based learning (PBL) and student-centered learning. More importantly, the current face-to-face model of curriculum implementation faces many challenges that seem to question its dominance over other models. The violent nature of the COVID-19 pandemic has again vindicated SDL practitioners and research enthusiasts to continue seeking solutions that will enhance skills to cope in a rapidly changing technological globalized world. However, the higher education sector is challenged when promoting SDL due to a slow pace of digital integration since the education system is not fully transformed. This has necessitated an urgent need for global discourse on how universities globally are implementing SDL strategies to enhance the quality of curriculum delivery. *Advancing Self-Directed Learning in Higher Education* provides insight into various strategic approaches that could be adopted for the successful implementation of SDL in higher education.

It is written for professionals who want to improve their understanding of how to improve student teaching and learning and the quality of curriculum implementation in higher education In this realm this book provides ideas to its readers about the approaches pertaining to strategy and innovative measures practical implementations and tools in the field of curriculum and SDL Covering topics such as educational technology intentional education practice theory and student experience this premier reference source is an essential resource for teachers policymakers lecturers research scholars students of higher education administrators librarians academicians and researchers

If you are looking for the definitive resource to help you measure your students' achievement, your search is over. *PE Metrics: Assessing Student Performance Using the National Standards* as such, the elementary level assessments center heavily on Standard 1. In part III, the emphasis shifts to middle school assessments with a concentration on Standard 2 and on the categories of dance and rhythms, invasion games, net/wall games, fielding, striking games, outdoor pursuits, aquatics, and individual performance activities. Part IV offers sample assessments for high school students with a priority on providing evidence of the knowledge and skills students will need to remain active and fit after they leave high school. This resource provides a comprehensive performance-based assessment system that enables you to incorporate assessment into every facet of your teaching, create assessments that are unique to your program, and measure your students' performance against the grade-level outcomes. The assessments are process-focused and are designed to measure multiple constructs as well as provide meaningful feedback to students, ultimately helping them to develop holistically across all three learning domains: psychomotor, cognitive, and affective. *PE Metrics* will help you instill in students the knowledge, skills, and confidence they need to enjoy a lifetime of healthful physical activity.
