## **Student Growth Objective Form:**

*Increasing Student Achievement through High-Performance Teacher Leadership* Matthew J. Jennings, 2021-11-19  
Teacher leadership has many potential benefits for colleagues and students. Unfortunately, due to unsupportive conditions and a lack of professional training, these benefits frequently do not materialize. To succeed, teacher leaders require a conducive school culture, supportive school administrators, time to complete responsibilities, appropriate incentives, and recognition and feedback designed to improve performance. In addition, highly effective teacher leaders participate in high quality professional learning intended to prepare them to fulfill their roles and responsibilities. This professional development prepares teacher leaders to utilize effective interpersonal skills, diagnose and manage school culture and politics, lead professional growth activities, provide instructional leadership, and assist with human resources management. This book provides the reader with both strategies for creating supportive conditions and the knowledge and skills required to meet the challenges of teacher leadership.

**Teacher Evaluation in Music** Cara Faith Bernard, Joseph Michael Abramo, 2019-01-04  
*Teacher Evaluation in Music: A Guide for Music Teachers in the U.S.* aims to help music teachers navigate the controversial terrain of teacher evaluation. Rather than entering the debate on policy divorced from practice, this book is intended as a pragmatic approach to help music teachers thrive within teacher evaluation systems and as a way to improve practice. Using Shulman's concept of content knowledge, general pedagogical knowledge, and pedagogical content knowledge, this book strives to help music teachers find a balance between advocating for themselves and their programs and for using teacher evaluation to improve their teaching. The book covers the history of policy and law of teacher evaluation and the competing uses of teacher evaluation to rate teachers or as a professional development tool. The descriptions of policies, laws, and competing uses are approached in a way to help music teachers use teacher evaluation for their benefit to grow as professionals. This book has chapters devoted to giving detailed and specific strategies in key areas that research has suggested music teachers struggle to implement: questioning, literacy, differentiated instruction, and assessment. Complementing these key areas are sample lesson plans which apply the strategies of questioning, differentiation, literacy, and assessment discussed in each chapter. These lessons serve as a resource and guide for teachers to develop their own lessons and improve their practice. The final chapter gives guidance on how music teachers may talk to administrators and evaluators to make teacher evaluation productive. Through these detailed descriptions of understanding teacher evaluation, talking to evaluators, and improving practice, music teachers may not just survive but thrive in these systems of accountability.
