Bailey,Carolyn A. Maher,Louise C. Wilkinson,2018-02-01 With a focus on what mathematics and science educators need to know about academic language used in the STEM disciplines this book critically synthesizes the current knowledge base on language challenges inherent to learning mathematics and science with particular attention to the unique issues for English learners These key questions are addressed When and how do students develop mastery of the language registers unique to mathematics and to the sciences How do teachers use assessment as evidence of student learning for both accountability and instructional purposes Orienting each chapter with a research review and drawing out important Focus Points chapter authors examine the obstacles to and latest ideas for improving STEM literacy and discuss implications for future research and practice **Resources in Education** ,2000-04 Expertise Jessica Gerrard,Jessica Holloway,2023-01-26 This book offers an important and timely critique of expertise showing how it is a keyword shaped by social historical and political debates about what counts as knowledge and truth and who counts as experts Using teacher expertise as an illustrative case Jessica Gerrard and Jessica Holloway reflect on recent events including COVID 19 and the climate crisis to examine how expertise is never neutral objective or fixed They argue that getting political is not just an inevitable part of teacher expertise but a necessary basis of any claim to it Across the chapters Expertise explores how expertise is socially constructed in relation to governance uses of data and evidence understandings of ignorance and the unknown and ultimately power Using contemporary and historical examples from international contexts the authors address the political positioning of expertise and how this creates boundaries between who is an expert and who is not and what is and is not expertise Gerrard and Holloway argue that ongoing policy debates about teacher expertise cannot be resolved by neutral definitions of good teaching Rather expertise is unavoidably political in its expression Oh, Florida!
