The Shale Dilemma Shanti Gamper-Rabindran, 2017-11-30 The US shale boom and efforts by other countries to exploit their shale resources could reshape energy and environmental landscapes across the world But how might those landscapes change Will countries with significant physical reserves try to exploit them Will they protect or harm local communities and the global climate Will the benefits be shared or retained by powerful interests And how will these decisions be made The Shale Dilemma brings together experts working at the forefront of shale gas issues on four continents to explain how countries reach their decisions on shale development Using a common analytical framework the authors identify both local factors and transnational patterns in the decision making process Eight case studies reveal the trade offs each country makes as it decides whether to pursue delay or block development Those outcomes in turn reflect the nature of a country s political

process and the power of interest groups on both sides of the issue The contributors also ask whether the economic arguments made by the shale industry and its government supporters have overshadowed the concerns of local communities for information on the effects of shale operations and for tax policies and regulations to ensure broad based economic development and environmental protection As an informative and even handed account The Shale Dilemma recommends practical steps to help countries reach better more transparent and more far sighted decisions *Technologies for Development* Silvia Hostettler, Samira Najih Besson, Jean-Claude Bolay, 2018-06-15 This open access book presents 18 case studies that explore current scientific and technological efforts to address global development issues such as poverty from a holistic and interdisciplinary point of view putting actual impacts at the centre of its analysis It illustrates the use of technologies for development in various fields of research such as humanitarian action medical and information and communication technology disaster risk reduction technologies habitat and sustainable access to energy The authors discuss how innovative technologies such as unmanned aerial vehicles for disaster risk reduction crowdsourcing humanitarian data online education and ICT based medical technologies can have significant social impact The book brings together the best papers of the 2016 International Conference on Technologies for Development at EPFL Switzerland The book explores how the gap between innovation in the global South and actual social impact can be bridged It fosters exchange between engineers other scientists practitioners and policy makers active at the interface of innovation and technology and human social and economic development *Routledge Handbook of National and Regional Ocean Policies* Biliiana Cicin-Sain, David Vanderzwaag, Miriam C. Balgos, 2015-05-15 This comprehensive handbook prepared by leading ocean policy academics and practitioners from around the world presents in depth analyses of the experiences of fifteen developed and developing nations and four key regions of the world that have taken concrete steps toward cross cutting and integrated national and regional ocean policy All chapters follow a common framework for policy analysis While most coastal nations of the world already have a variety of sectoral policies in place to manage different uses of the ocean such as shipping fishing oil and gas development in the last two decades the coastal nations covered in the book have undertaken concerted efforts to articulate and implement an integrated ecosystem based vision for the governance of ocean areas under their jurisdiction This includes goals and procedures to harmonize existing uses and laws to foster sustainable development of ocean areas to protect biodiversity and vulnerable resources and ecosystems and to coordinate the actions of the many government agencies that are typically involved in oceans affairs The book highlights the serious conflicts of use in most national ocean zones and the varying attempts by nations to follow the prescriptions emanating from the 1982 UN Law of the Sea Convention and the outcomes of the 1992 2002 and 2012 sustainable development summits The interrelationship among uses and processes in the coast and ocean requires that ocean governance be integrated precautionary and anticipatory Overall the book provides a definitive state of the art review and analysis of national and regional ocean policies around the world IAS Mains Paper
