**Pre-Med Studies Parent Lesson Plan** ,2013-08-01 Advanced Pre Med Studies Course Description Semester 1 From  
surgery to vaccines man has made great strides in the field of medicine Quality of life has improved dramatically in the last  
few decades alone and the future is bright But students must not forget that God provided humans with minds and resources  
to bring about these advances A biblical perspective of healing and the use of medicine provides the best foundation for  
treating diseases and injury In *Exploring the History of Medicine* author John Hudson Tiner reveals the spectacular  
discoveries that started with men and women who used their abilities to better mankind and give glory to God The  
fascinating history of medicine comes alive in this book providing students with a healthy dose of facts mini biographies and  
vintage illustrations It seems that a new and more terrible disease is touted on the news almost daily The spread of these  
scary diseases from bird flu to SARS to AIDS is a cause for concern and leads to questions such as Where did all these germs  
come from and how do they fit into a biblical world view What kind of function did these microbes have before the Fall Does  
antibiotic resistance in bacteria prove evolution How can something so small have such a huge deadly impact on the world  
around us Professor Alan Gillen sheds light on these and many other questions in *The Genesis of Germs* He shows how these  
constantly mutating diseases are proof for devolution rather than evolution and how all of these germs fit into a biblical world  
view Dr Gillen shows how germs are symptomatic of the literal Fall and Curse of creation as a result of man s sin and the  
hope we have in the coming of Jesus Christ Semester 2 *Body by Design* defines the basic anatomy and physiology in each of  
11 body systems from a creationist viewpoint Every chapter explores the wonder beauty and creation of the human body  
giving evidence for creation while exposing faulty evolutionist reasoning Special explorations into each body system look  
closely at disease aspects current events and discoveries while profiling the classic and contemporary scientists and  
physicians who have made remarkable breakthroughs in studies of the different areas of the human body Within *Building*  
*Blocks in Life Science* you will discover exceptional insights and clarity to patterns of order in living things including the
