Expanding West

Americans Move West

In the early 1800s, Americans started to move westward beyond the boundaries of the original 13 states. They crossed the Appalachian Mountains and settled in areas near the Ohio and Mississippi Rivers. The rivers were key to moving goods. The port of New Orleans, at the mouth of the Mississippi River was a vital port for American trade.

The Louisiana Purchase

Jefferson wanted to ensure that no other country would gain control of the valuable port of New Orleans. France controlled all of the area from New Orleans to the Rocky Mountains but Napoleon, the current ruler of France, was no longer interested in holding this territory. Jefferson was able to negotiate a purchase with France to secure the Louisiana Territory and transfer control of it to the Americans. The United States bought the western territory for \$15 million. This is known as the **Louisiana Purchase**. The territory stretched westward from the Mississippi River to the Rocky Mountains and from the southern border of the Gulf of Mexico to Canada. This was a huge amount of territory. This *doubled* the size of the United States!

A Contradiction

Jefferson was a strict constructionist. He held the belief that powers only existed if the Constitution explicitly stated they did. This was the reason for his major debate with Hamilton over the creation of a national bank. Jefferson argued it could not be done because the

Constitution did not state it could be. The Constitution also does not state, anywhere, that the president has the power to purchase territory from another country. Article IV states that new states can be added but does not describe acquiring territory from foreign powers. Jefferson's purchase established another powerful precedent for how new territory could be added. Now, territory could be gained through conquests and treaties but also by purchase.
