### Key Concepts

- The limiting reactant is the reactant that is completely consumed during a chemical reaction. Reactants that remain after the reaction stops are called excess reactants.
- To determine the limiting reactant, the actual mole ratio of the available reactants must be compared with the ratio of the reactants obtained from the coefficients in the balanced chemical equation.
- Stoichiometric calculations must be based on the limiting reactant.

**Transport Phenomena for Chemical Reactor Design** Laurence A. Belfiore, 2003-04-11 Laurence Belfiore's unique treatment meshes two mainstream subject areas in chemical engineering transport phenomena and chemical reactor design Expressly intended as an extension of Bird Stewart and Lightfoot's classic Transport Phenomena and Froment and Bischoff's Chemical Reactor Analysis and Design Second Edition Belfiore's unprecedented text explores the synthesis of these two disciplines in a manner the upper undergraduate or graduate reader can readily grasp Transport Phenomena for Chemical Reactor Design approaches the design of chemical reactors from microscopic heat and mass transfer principles It includes simultaneous consideration of kinetics and heat transfer both critical to the performance of real chemical reactors Complementary topics in transport phenomena and thermodynamics that provide support for chemical reactor analysis are covered including Fluid dynamics in the creeping and potential flow regimes around solid spheres and gas bubbles The corresponding mass transfer problems that employ velocity profiles derived in the book's fluid dynamics chapter to calculate interphase heat and mass transfer coefficients Heat capacities of ideal gases via statistical thermodynamics to calculate Prandtl numbers Thermodynamic stability criteria for homogeneous mixtures that reveal that binary molecular diffusion coefficients must be positive In addition to its comprehensive treatment the text also contains 484 problems and ninety six detailed solutions to assist in the exploration of the subject Graduate and advanced undergraduate chemical engineering
