Medico-Social Management of Inherited Metabolic Disease D.N. Raine,2012-12-06 The study of inherited metabolic disease became a subject of more than academic interest in 1953 when Bickel Gerrard and Hickmans discovered that the totally disabling consequences of phenylketonuria could be prevented if treatment was instituted in the first months of life This required the widespread screening of all newborn babies and 7 years later this had been successfully achieved in the United Kingdom The next 10 years was a period of consolidation screening methods were improved and extended to include other disorders treatment of phenylketonuria was vastly improved with the stimulus of the increasing numbers of patients being detected and research into new forms of therapy for some of the other disorders being detected has been initiated The success of this scheme is illustrated by the remarkable achievement reported by the Phenylketonuria Registry referred to in the present volume But at what cost has this progress been made It is unnecessary to discuss the financial cost for many of the developments would not have been started if their economic value in the system of health care had not been unequivocally established

The Naked Clone John Charles Kunich, 2003-06-30 Banning therapeutic and reproductive cloning jeopardizes more than cloning itself The constitutional principles intertwined with cloning embrace such vital liberties as personal autonomy privacy reproduction and freedom of expression Properly understood cloning is essentially the same as other forms of assisted reproduction Procrustean bans on cloning implicate and indirectly threaten numerous key personal interests including abortion in vitro fertilization same sex adoption and surrogacy A government allowed to preemptively isolate and censor medico scientific research into cloning may be emboldened to shut down other forms of disfavored inquiry and expression as well Much of the animosity toward cloning is based on unfounded fear science fiction fantasy moralistic bias and slippery slope predictions most of which is scientifically untenable or already illegal Yet when people are cloned they will in fact be less similar than identical twins genetics aren't everything Differing environments produce differing people and human clones distinct individuals will be entitled to the same human rights and legal protections that have protected individuals for centuries Kunich establishes the pressing need to evaluate cloning in a rational scientific and legal manner before the extreme opposition sprouting from fear and misunderstanding which has already led to several state laws results in an unconstitutional federal ban
