Section 5 Guided And Review China:

The Handbook of China's Financial System Marlene Amstad, Guofeng Sun, Wei Xiong, Darrell Duffie, 2020-11-17 The Chinese economy is now easily one of the most important and closely scrutinized economies in the world. Relatively minuscule changes in predictions of how the Chinese economy will perform can drive up or down stocks and the price of oil and other commodities. At the heart of how the Chinese economy works is its financial system, but the Chinese financial system is vastly different than most people in the West can understand. How do house prices work, for example, in a country where the very concept of property ownership is significantly different than our own? This edited volume will serve as a standard reference guide to China's financial system. With eighteen chapters, the handbook features overviews on the banking sector, the core of China's financial system, and the key channel for implementing China's monetary policy; China's ongoing reforms; and the quickly growing bond and money markets, among other topics. Each chapter is written by a leading expert in the field, and as a whole, the list of contributors represents an impressive mix of leading scholars and high-level policy officials, some with first-hand knowledge of setting and carrying out Chinese financial policy. The handbook will serve as the first real authoritative volume of literature in the field and will shed extensive new light on the links between China's financial system and the real economy.

Trends in Sustainable Buildings and Infrastructure Víctor Yepes, Ignacio Navarro Martínez, 2021-06-11

The recently established Sustainable Development Goals call for a paradigm shift in the way that buildings and infrastructures are conceived The construction industry is a major source of environmental impacts given its great material consumption and energy demands It is also a major contributor to the economic growth of regions through the provision of useful infrastructure and generation of employment among other factors Conventional approaches underlying current building design practices fall short of covering the relevant environmental and social implications derived from inappropriate design construction and planning The development of adequate sustainable design strategies is therefore becoming extremely relevant regarding the achievement of the United Nations 2030 Agenda Goals for Sustainable Development This book comprises 11 chapters that highlight the actual research trends in the construction sector aiming to increase the knowledge on sustainable design practices by highlighting the actual practices that explore efficient ways to reduce the environmental consequences related to the construction industry while promoting social wellbeing and economic development The chapters collect papers included in the Special Issue Trends in Sustainable Buildings and Infrastructure of the International Journal of Environmental Research and Public Health

Chinese Authoritarianism in the Information Age Suisheng Zhao, 2019-06-24 This book examines information and public opinion control by the authoritarian state in response to popular access to information and upgraded political communication channels among the citizens in contemporary China Empowered by mass media particularly social media and other information technology Chinese citizens access to information has been expanded Publicly focusing events and opinions have served as catalysts to shape the agenda for policy making and law making narrow down the set of policy options and change the pace of policy implementation Yet the authoritarian state remains in tight control of media including social media to deny the free flow of information and shape public opinion through a centralized institutional framework for propaganda and information technologies The evolving process of media control and public opinion manipulation has constrained citizens political participation and strengthened Chinese authoritarianism in the information age The chapters originally published as articles in the Journal of Contemporary China
