Suranjan Saha, Sabita Saha, *Didactical Phenomenology of Mathematical Structures* Hans Freudenthal, 2005-11-28 The launch of a new book series is always a challenging event not only for the Editorial Board and the Publisher but also and more particularly for the first author Both the Editorial Board and the Publisher are delighted that the first author in this series is well able to meet the challenge Professor Freudenthal needs no introduction to anyone in the Mathematics Education field and it is particularly fitting that his book should be the first in this new series because it was in 1968 that he and Reidel produced the first issue of the journal Educational Studies in Mathematics Breaking fresh ground is therefore nothing new to Professor Freudenthal and this book illustrates well his pleasure at such a task To be strictly correct the ground which he has broken here is not new but as with Mathematics as an Educational Task and Weeding and Sowing it is rather the novelty of the manner in which he has carried out his analysis which provides us with so many fresh perspectives It is our intention that this new book series should provide those who work in the emerging discipline of mathematics education with an essential resource and at a time of considerable concern about the whole mathematics curriculum this book represents just such a resource
