**Political science in motion** Ramona Coman, Jean-Frédéric Morin, 2019-08-06

What are the main trends in contemporary political science research This book examines recent developments in political science research What are the new influences to which the discipline opens itself up Is political science research converging towards a single model or splitting into different streams What are the new challenges at the beginning of the 21st century This collection of essays discusses three interrelated topics the relationship between political science and the problems of politics the relationship between political science and other fields of research and the transformation of the profession

EXTRACT The past the present and the future of political science have always been a topic of inquiry for political scientists This collection of essays is not the first to explore the evolution of the discipline Since its inception scholars of politics of all persuasions have re produced the story of the field as a discipline and as a profession Farr et al 1990 598 Blondiaux 1997 10 Gunnell 2002 339 Dryzek 2002 2006 They have explored the discipline s relation with its social and political environment they have questioned its epistemological and ontological specificities and more recently they have documented its professional standards codes and practices As the discipline expands in different parts of the world the attention devoted to its evolution and development has increased Political science is a recognized object of study and state of the discipline studies are flourishing This book seeks to contribute to these recent debates about the evolution of the discipline by exploring three interrelated themes namely 1 the discipline s co evolution with politics 2 its changing relations with sister disciplines 3 and the transformation of its practices for knowledge production and dissemination We argue in this volume that these topics are fundamental as they directly address the core identity of political science

ABOUT THIS BOOK There is very little literature on academic journals and how they function or what they achieve and Political Science in Motion is to be welcomed as a step towards filling that gap It is well edited as is evident from the cross references between chapters It

answers some of the questions that one might want to ask while others remain unanswered Wyn Grant The London School of Economics and Political Science Review of books *Understanding Securitisation Theory* Thierry Balzacq, 2010-09-13 This volume aims to provide a new framework for the analysis of securitization processes increasing our understanding of how security issues emerge evolve and dissolve Securitisation theory has become one of the key components of security studies and IR courses in recent years and this book represents the first attempt to provide an integrated and rigorous overview of securitization practices within a coherent framework To do so it organizes securitization around three core assumptions which make the theory applicable to empirical studies the centrality of audience the co dependency of agency and context and the structuring force of the dispositif These assumptions are then investigated through discourse analysis process tracing ethnographic research and content analysis and discussed in relation to extensive case studies This innovative new book will be of much interest to students of securitisation and critical security studies as well as IR theory and sociology Thierry Balzacq is holder of the Tocqueville Chair on Security Policies and Professor at the University of Namur He is Research Director at the University of Louvain and Associate Researcher at the Centre for European Studies at Sciences Po Paris

*Energy Security for the EU in the 21st Century* José María Marín Quemada, Javier García-Verdugo, Gonzalo Escribano, 2012-03-12 Recent developments like the rising trend in crude oil price the international economic crisis the civil revolts in Northern Africa and the Middle East the nuclear threat in Japan after the tsunami the oil spill in the Gulf of Mexico and the economic growth of emerging countries like China and India have a direct relation to the security of energy supply anywhere in the world This book provides a comprehensive analysis of energy risks energy scenarios and energy policies with special reference to the European Union and its member states emphasizing the economic and geopolitical dimensions of energy security The book assesses both quantitatively and

### **Commercialising Security in Europe**

Anna Leander, 2013-06-26. This book examines the political consequences of European security commercialisation through increased reliance on private military and security companies (PMSCs). The role of commercial security in the domestic setting in Europe is widely acknowledged after all the biggest private security company globally G4S Group has its roots in Scandinavia. However the use of commercial security contracting by European states for military purposes in international settings is mostly held to be marginal. This book examines the implications of commercialisation for the peace and reconciliations strategies of European states focussing specifically on European contracting in Afghanistan. Drawing upon examples from Scandinavia, Central Europe and Continental Europe each chapter considers three key factors: the national contexts that give security contracting in Afghanistan its meaning; the national contracting practices; the political consequences for the operation in Afghanistan. ### **Understanding Energy Security in**

**Central and Eastern Europe** Wojciech Ostrowski, Eamonn Butler, 2018-04-09. The purpose of this book is to move beyond the approach which views energy as a purely geopolitical tool of the Russian state and assumes a one size fits all approach to energy security in Central and Eastern Europe (CEE). It argues that in order to fully understand Russian involvement in the regional energy complex the CEE Russian energy relationship should be analysed in the context of the political and economic transitions that Russia and the CEE states underwent. The chapters on individual countries in the book demonstrate that although Russia has and will continue to play a substantial role in the CEE energy sector the scope of its possible influence has been overstated.
