This Research Topic will focus on neuroscience but it will welcome contributions on purely behavioural and psychophysiological studies patient reports computational investigations as well as philosophical and historical analyses of the relationship between executive control and consciousness In particular we encourage experts in this field to submit contributions in the form of a reviews opinions and discussions on existing literature concerning unconscious processing of information in executive control b original research articles both behavioural only and neuroimaging studies on unconscious processing of information in executive control c discussions and opinions on new methodologies to investigate this issue e g other than masked priming which has been the technique of choice in most of the existing studies
