### Instructions and scoring

The REACH is a 23-item measure of childhood emotional abuse that encompasses a range of types of emotional abuse. In addition, it yields two sub-scales: a threat sub-scale which measures behaviours that can are likely to cause fear or fright, and a devaluing subscale that describes behaviours likely to engender the impression that a child is 'lesser than', disliked or worthless. It also yields a total score. The REACH is free to use, provided that a statement of copyright is included in any output.
