Name: _____

Date: _____

Introduction: Histology is often a very difficult topic for students. You are expected to understand the morphology and function of various tissue types, and be able to identify these tissue types in a drawing or a prepared slide.

Part 1: Flash Cards

You will be given a "flash card" with information about a specific tissue type on it. Cards are clearly labeled. You must find the other members that have information about your specific tissue type.

A complete group of 3 will include cards on:

1. Type of tissue and morphology
2. Appearance of real cells (image)
3. Location/Function of tissue

Once your members "find" each other be prepared to tell the class why your cards go together and identify one cell by circling it on the image.

Part 2: Microscope Slides and Internet

Follow the instructions for making a lab drawing and based on your observations of slides under the microscope and on the websites, draw simple, accurate diagrams that illustrate the features of the 8 tissue types (see list below). Write your name clearly on the top of each paper. Be sure to clearly title the slide/tissue type and point out unique features of that cell or tissue type. In general, each diagram should be large enough to take up half a sheet of paper; all drawings should be done at high power (400x).

Drawings to hand in:

- ✓ One type of simple epithelium.
- ✓ One other type (not simple) epithelium.
- ✓ Compact bone.
- ✓ One type of cartilage.
- ✓ One other kind of connective tissue.
- ✓ All three types of muscle tissue.
