Prior Knowledge Questions (Do these BEFORE using the Gizmo.)

1. Have you ever made microwave popcorn? If so, what do you hear while the popcorn is in the microwave? Yes, I hear the kernels popping in the bag.
2. If you turn the microwave on for two minutes, is the rate of popping always the same, or does it change? Explain. The rate of popping is not always the same because when you first put the bag of popcorn in and start the microwave, there is not a lot of popping, but when the contents of the bag begin to heat up, the popping increases. By the end of the cooking session, all of the kernels should be popped so there is no more popping.

Gizmo Warm-up

Like an unpopped kernel in the microwave, a **radioactive atom** can change at any time. Radioactive atoms change by emitting **radiation** in the form of tiny particles and/or energy. This process, called **decay**, causes the radioactive atom to change into a stable **daughter atom**.

The *Half-life* Gizmo™ allows you to observe and measure the decay of a radioactive substance. Be sure the sound is turned on and click **Play** (▶).

1. What do you see and hear? There is a static sort of popping sound as the atoms turn from red to blueish gray.

Note: The clicking sound you hear comes from a **Geiger counter**, an instrument that detects the particles and energy emitted by decaying radioactive atoms.

delivering a Blitzkrieg advance perhaps one that took advantage of night time hours One of the German officers who was tasked with delivering this audacious victory was the battle hardened veteran SS Obersturmbannführer Jochen Peiper A Waffen SS officer and one of the most celebrated heroes of Hitler's armies Peiper and the SS Panzer Division Leibstandarte as a whole were already on his mind A long time adjutant of Heinrich Himmler and completely dedicated to the Nazi cause Peiper had fought in every major campaign of the Second World War However having been wounded in Normandy following the D Day landings Peiper also ailing from a combination of battle fatigue and hepatitis had been evacuated to a field hospital and then back Germany in August 1944 It was while he was recuperating at the SS Reserve Hospital 501 overlooking Lake Tegernsee in Bavaria that Peiper learnt of his part in the forthcoming offensive Though his skin had a sickly ochre cast from jaundice and three years of front line combat too many days of coffee and cigarettes followed by nights of fighting and frustration and the fact that his nerves were shot he had been selected as one of the men who would lead the Führer's final great gamble Comprising some 4 800 men and 600 vehicles including a number of the powerful Tiger II heavy tanks Kampfgruppe Peiper played a central part in the Ardennes Offensive or the Battle of the Bulge as it is commonly known which was unleashed on 16 December 1944 It is a role that is explored here by Danny S Parker who reveals the successes defeats and war crimes that Kampfgruppe Peiper was involved in before the Ardennes Offensive ended in failure in January 1945
