Claim:
There are different aquatic systems with diverse organisms.

Evidence	Reasoning/Justification
Aquatic ecosystems have abiotic - temp, light, salinity, depth	Different organisms can tolerate different factors
Some organisms prefer fresh water vs. saltwater. Bull sharks + manatees tolerate both	Bull sharks and manatees are very different, but tolerate same conditions
Depth reduces light and increases pressure. Organisms deal with this differently.	Many types of adaptations exist to survive in these conditions
The geography of an aquatic environment can determine the life forms present.	Continental shelf gets lots of light, so there's many living things. Not so in the abyss.
Photosynthesis takes place in the neritic zone.	It is the most productive area of the ocean. Plankton are base of food chain.
Metabolism is affected by temp. Many species are cold-blooded.	Organisms can migrate or must have adaptations to survive.

Student Math Note Taking Guide:

Teach Math Like This, Not Like That Matthew L. Beyranevand, 2017-05-24 Teaching mathematics is one of the most difficult and important jobs that anyone can do Mathematics is a critical part of education and an essential building block for problem solving skills that are needed in the real world However many students struggle to learn and understand mathematical concepts and educators need to do everything possible to help our students learn This book focuses on four areas necessary to be an impactful teacher of mathematics Planning Pedagogy Assessment and Relationships For each of the ideas presented in the book a brief introduction will be shared and then two different perspectives will be detailed with examples The first is Not like This which is often the traditional way of teaching mathematics or the less effective approach The second perspective is Teach Like This which is my recommended approach based upon research and my own experience as a teacher math coordinator and graduate instructor of math education **Math In Plain English** Amy

Benjamin, 2013-10-02 Do word problems and math vocabulary confuse students in your mathematics classes Do simple keywords like value and portion seem to mislead them Many words that students already know can have a different meaning in mathematics To grasp that difference students need to connect English literacy skills to math Successful students speak read write and listen to each other so they can understand retain and apply mathematics concepts This book explains how to use 10 classroom ready literacy strategies in concert with your mathematics instruction You ll learn how to develop students who are able to explain to themselves and communicate to others what problems mean and how to attack them Embedding these strategies in your instruction will help your students gain the literacy skills required to achieve the eight Common Core State Standards for Mathematics You ll discover the best answer to their question When am I ever going to use this The 10 Strategies 1 Teaching mathematical words explicitly 2 Teaching academic words implicitly 3 Reinforcing reading comprehension skills that apply to mathematics 4 Teaching mathematics with metaphor and gesture 5 Unlocking the meaning of word problems 6 Teaching note taking skills for mathematics 7 Using language based formative assessment in mathematics 8 Connecting memorization to meaning in mathematics 9 Incorporating writing to learn activities in mathematics 10 Preparing students for algebraic thinking **Winning at Math** Paul D. Nolting, 2002 Every student must pass math courses to graduate Doing well in math can both increase your career choices and allow you to graduate Winning at Math will help you improve your math grades quickly and easily The format of Winning at Math has been revised to make it easier to read and it contains much more proven math study skills techniques The chapter on test anxiety has been expanded to assist students with math anxiety not just test anxiety From publisher s description **Resources in Education** , 2001
