Student Exploration: Osmosis

Vocabulary: cell membrane, concentration, diffusion, dynamic equilibrium, osmosis, semipermeable membrane, solute, solvent

Prior Knowledge Questions (Do these BEFORE using the Gizmo.)

1. Suppose you were trapped on a desert island with no sources of fresh water. Should you drink water from the ocean? Explain why or why not.

I would not drink the water from the ocean because the ocean water contains all sorts of bacteria and unknown particles since it didn't go through water purifier. Also, salt is contained in ocean water which leads to dehydration.

2. What do you think would happen if you watered your houseplants with salt water?

The existing water inside the cells will be drained out due high concentration of salt water, and as this phenomenon continues the cells will die (X water)

Gizmo Warm-up

A **cell membrane** is a thin "skin" that surrounds a cell. It is a **semipermeable membrane**, which means that some particles pass through the membrane easily while others cannot.

The Osmosis Gizmo™ portrays a cell (red square) in a solution of purple **solute** particles dissolved in green **solvent** particles. Press **Play** () and observe.

1. Which particles can pass through the cell membrane?

Green solvent particles can pass through

2. Which particles cannot pass through the cell membrane? Purple solute particles can't

3. Click **Reset** () , and then click **Play** again. What do you notice about the size of the cell?

The cell size increases quickly and stays tremoring when reached to volume 50%.

Mindset Matters Daniel R. Porterfield, 2024-06-25 How colleges can foster growth mindsets among students and why this approach matters We live in an era of escalating tech fueled change Our jobs and the skills we need to work and thrive are constantly evolving and those who can't keep up risk falling behind That's where college comes in In Mindset Matters Daniel R Porterfield advances a powerful new argument about the value of residential undergraduate education and its role in developing growth mindsets among students The growth mindset according to Porterfield is the belief that we can enhance our core qualities or talents through our efforts strategies and education and with assistance from others People with growth mindsets have faith in self improvement They tend to be goal oriented and optimistic confident that they can master new challenges because they've

done so in the past Feedback is their friend errors their opportunities to begin again For students like this college is a multiyear process of self creation and self emergence a becoming that unfolds because they are applying themselves in a place rich with stimulating people happenings resources and ideas America s colleges and universities help students build the skills and self confidence they need for lifelong discovery creativity mentorship teamwork and striving These five mindsets the book argues are critical for thriving in disruptive times and students who develop them will reap the rewards long after they graduate To show how college activates these mindsets and why it matters Porterfield shares the personal stories of thirty recent graduates many the first in their families to attend college Their growth was both self powered and supported by involved faculty engaged peers and opportunity rich campuses Porterfield also outlines how colleges and universities can do more to foster cultures of mentoring and personalized learning that help students become leaders of their own learning

Special Religious Education in Australia and its Value to Contemporary Society Zehavit Gross,Suzanne D. Rutland,2021-02-22 This book explores the advantages of and challenges concerning Special Religious Education SRE in multicultural Australia and argues for the need for General Religious Education GRE as well Through the lens of the most recent scholarship and drawing on an in depth qualitative study and specific case studies the book examines the current debate on the role of religious education within government schools It addresses key concepts of values education spirituality health and wellbeing and cultural and religious identity It analyses why it is important to retain SRE together with GRE as government policy It explores highly relevant controversial and contested issues regarding

SRE including the 30% of Australia's population who declare themselves as having no religion and brings fresh insights to the table. While secularization has increased in both the national and international spheres there has also been an increase in fundamentalism within religious beliefs. Events such as the September 11 terror attacks and the more recent mass shootings by white supremacists and eco fascists in Christchurch New Zealand and Pittsburgh and San Diego in the USA are reminders that religion is still a major actor in the twenty first century. This poses new challenges for the relationship between church and state and demonstrates the need to revisit the role of religious education within government schools. While the importance of GRE is generally acknowledged SRE has increasingly come under attack by some researchers and teacher and parent bodies as being inappropriate and contradictory to the values of the postmodern world. On the other hand the key stakeholders from all the faith traditions in Australia wish to retain the SRE classes in government schools. The book addresses this burning issue and shows that it is relevant not only for Australia but also globally.
