Poetics of Redemption Andreas Kahlitz, 2021-02-08 The essays on Dante collected in this volume interpret his Commedia as the attempt of a renewal of the Christian work of salvation by means of literature In the view of his author the sacro poema responds to a historical moment of extreme danger in which nothing less than the redemption of mankind is at stake The degradation of the medieval Roman Empire and the rise of an early capitalism in his birth town Florence entailing a pernicious moral depravation for Dante are to him nothing else but a variety of symptoms of the backfall of the world into its state prior to its salvation by the incarnation of Christ Dante presents his journey into the other world as an endeavor to escape these risks Mobilizing the traditional procedures of literary discourse for this purpose he aims at writing a text that

overcomes the deficiencies of the traditional Book of Revelation that on its own terms no longer seems capable of fulfilling his traditional tasks The immense revaluation of poetry implied in Dante's *Commedia* thus contemporarily involves the claim of a substantial weakness of the institutional religious discourse **The Ultimate Italian** Fulvio Conti, 2022-12-23 This book shows how Dante Alighieri has been represented in the Italian collective imagination from the late eighteenth century to the present day Often held to be a precursor of Italian unity the author of the *Divine Comedy* has been put forward both as a standard bearer of a secular anti-clerical Italy and the embodiment of the concept of a deeply religious and Catholic nation while he was later adopted by nationalist and fascists as well as a pop icon in the age of the internet and globalization The book describes this long and fascinating history from a completely original point of view the centuries-old myth of Dante is analysed from the perspective of cultural history The sources employed include Dante commemorations festivals and monuments pilgrimages to his tomb films and other media productions about Dante as well as comic strips advertisements and other cultural items dedicated to him **The Metaphysics of Dante's Comedy** Christian Moevs, 2008-10-13 The recovery of Dante's metaphysics which are very different from our own is essential argues Christian Moevs if we are to resolve what has been called the central problem in the interpretation of the *Comedy* That problem is what to make of the *Comedy's* claim to the status of revelation vision or experiential record as something more than imaginative literature In this book Moevs offers the first sustained treatment of the metaphysical picture that grounds and motivates the *Comedy* and the relation between those metaphysics and Dante's poetics Moevs arrives at the radical conclusion that Dante believed that all of what we perceive as reality the spatio-temporal world is in fact a creation or projection of conscious being Armed with this new understanding Moevs is able to shed light on a series of perennial issues in the interpretation of the *Comedy*

America in Italy Axel Körner, 2017-06-13 *America in Italy* examines the influence of the American political experience on the imagination of Italian political thinkers between the late eighteenth century and the unification of Italy in the 1860s Axel Körner shows how Italian political thought was shaped by debates about the American Revolution and the U.S. Constitution but he focuses on the important distinction that while European interest in developments across the Atlantic was keen this attention was not blind admiration Rather America became a sounding board for the critical assessment of societal changes at home Many Italians did not think the United States had lessons to teach them and often concluded that life across the Atlantic was not just different but in many respects also objectionable In America utopia and dystopia seemed to live side by side and Italian references to the United States were frequently in support of progressive or reactionary causes Political thinkers including Cesare Balbo Carlo Cattaneo Giuseppe Mazzini and Antonio Rosmini used the United States to shed light on the course of their nation's political resurgence Concepts from Montesquieu Rousseau and Vico served to evaluate what Italians discovered about America Ideas about American domestic manners were reflected and conveyed through works of ballet literature opera and satire Transcending boundaries between intellectual and cultural history *America in Italy* is the

first book length examination of the influence of America s political formation on modern Italian political thought **Subject Index of the Modern Works Added to the Library of the British Museum** British Museum,British Museum. Department of Printed Books,1897 **A Subject Index of the Modern Works Added to the Library of the British Museum in the Years 1891-1895** George Knottesford Fortescue,1897 *Authority, Innovation and Early Modern Epistemology* Martin McLaughlin,2017-07-05 Giordano Bruno 1548 1600 who died at the stake is one of the best known symbols of anti establishment thought The theme of this volume which is offered as a collection of essays to honour the distinguished Bruno scholar Hilary Gatti reflects her constant concern for the principles of cultural freedom and independent thinking Several essays deal with Bruno himself including an analysis of the *Eroici furori* a study of his reception in relation to the group known as the Novatores and discussions of several important aspects of his stay in England The authors and texts discussed here are linked by a relentless interest in the question of authority and originality and they range from literary figures such as Alberti 1404 72 Vasari 1511 74 and the proponents of quantitative verse in sixteenth century England to controversial philosophers who like Bruno were condemned by the Church such as Tommaso Campanella 1568 1639 and Giulio Cesare Vanini 1585 1619 Taken together these chapters show how much that was new and revolutionary in early modern culture came from its confrontation with the past Martin McLaughlin is Agnelli Serena Professor of Italian at Oxford Elisabetta Tarantino is a Teaching Fellow in the Department of Italian at the University of Warwick [Catalogue of Printed Books](#) British Museum. Department of Printed Books,1900 **General Catalogue of Printed Books** British Museum. Department of Printed Books,1931 *In the Footsteps of Dante* Teresa Bartolomei,Joao R. Figueiredo,2023-01-30 Dante the pilgrim is the image of an author who stubbornly looks ahead seeking and building the Great Beyond Manguel Following in his footsteps is therefore not a return to the past going rebours but a commitment to the future to exploring the potential of humanity to transhumanise This dynamic of self transcendence in Dante s humanism Ossola which claims for European civilisation a vocation for universalism Ferroni is analysed in the volume at three crucial moments Firstly the establishment of an emancipatory relationship between author and reader Ascoli in which authorship is authority and not power secondly the conception of vision as a learning process and horizon of eschatological overcoming Mendon a finally the relationship with the past which is never purely monumental but ethically and intertextually dynamic in an original rewriting of the original scriptural medieval and classical culture Nasti Bolzoni Bartolomei A second group of contributions is dedicated to the reconstruction of Dante s presence in Portuguese literature Almeida Esp rito Santo Figueiredo Marnoto Vaz de Carvalho they attest to the innovative impact of Dante s work even in literary traditions more distant from it **Guild and State** Antony Black,2017-09-08 Guild and State examines the values of social solidarity and fraternity that emerged from medieval guilds and city communes and the effect of traditional corporate organization of labor on socioeconomic attitudes and theories of the state What ordinary guildsmen and townsmen thought about these issues can be gleaned from chronicles

charters and reported slogans But in tracing attitudes toward the guilds of early Germanic times to today's equivalent trade unions a distinction must be made between popular ethos and learned philosophy In Europe from the twelfth to the seventeenth centuries the corporate organization of labor and of town market communities developed side by side with the ideals of personal liberty market freedom and legal equality Self governing labor organizations and civil freedom developed together as coherent practices The values of mutual aid and craft honor on the one hand and of personal freedom and legal equality on the other formed the moral infrastructure of our civilization Alternate ideals balanced harmonized and even cross fertilized one another as in the principle of freedom of association Contrary to preconceptions however corporate values were seldom expressed philosophically in the Middle Ages Political theory and the world of learning from the start emphasized liberal values It was only after the Reformation that guild and communal values found expression in political theory Even then only a few philosophers acknowledged that solidarity and exchange the poles around which the values of guild and civil society respectively rotate are not opposites but complementary and attempted to weave these together into a texture as tough and complex as that of urban society itself By showing that the ideals of social solidarity and workers rights have often been intertwined with liberty and equality rather than in opposition to them this book provides an unexpected explanation and rationale for the Third Way The Enlightenment and industrialization led to an apotheosis of liberal values Guilds disappeared and were only in part replaced by labor unions the values of market exchange have since been in the ascendant though Hegel Durkheim and more recently advocates of liberal corporatism maintain the possibility of a symbiosis between corporate and liberal values In *Guild and State* there emerges an alternative history of political thought which will be fascinating to the general as well as the specialist reader

Ethics Through Literature Brian Stock, 2007 Why do we read Based on a series of lectures delivered at the Historical Society of Israel in 2005 Brian Stock presents a model for relating ascetic and aesthetic principles in Western reading practices He begins by establishing the primacy of the ethical objective in the ascetic approach to literature in Western classical thought from Plato to Augustine This is understood in contrast to the aesthetic appreciation of literature that finds pleasure in the reading of the text in and of itself Examples of this long standing tension as displayed in a literary topos first outlined in these lectures which describes scenes of reading are found in the works of Peter Abelard Dante and Virginia Woolf among others But as this original and often surprising work shows the distinction between the ascetic and aesthetic impulse in reading while necessary is often misleading As he writes All Western reading it would appear has an ethical component and the value placed on this component does not change much over time Tracing the ascetic component of reading from Late Antiquity through the Renaissance and beyond to Coleridge and Schopenhauer Stock reveals the ascetic or ethical as a constant with the aesthetic serving as opposition parallel force and handmaiden underscoring the historical consistency of the reading experience through the ages and across various media

Rituals of Literature Gian Balsamo, 2004-06 Balsamo's *Rituals of Literature* is devoted to Joyce's and Dante's

special contributions to the tradition of Christian epics born out of Biblical stories and Homeric poems By highlighting the integrated nature of its typical tropes Joyce and Dante establish the historical identity of the Christian epic as a distinct literary genre

Writing Beyond Pen and Parchment Ricarda Wagner, Christine Neufeld, Ludger Lieb, 2019-10-21 What can stories of magical engraved rings or prophetic inscriptions on walls tell us about how writing was perceived before print transformed the world Writing beyond Pen and Parchment introduces readers to a Middle Ages where writing is not confined to manuscripts but is inscribed in the broader material world in textiles and tombs on weapons or human skin Drawing on the work done at the Collaborative Research Centre Material Text Cultures SFB 933 this volume presents a comparative overview of how and where text bearing artefacts appear in medieval German Old Norse British French Italian and Iberian literary traditions and also traces the paths inscribed objects chart across multiple linguistic and cultural traditions The volume's focus on the raw materials and practices that shaped artefacts both mundane or fantastical in medieval narratives offers a fresh perspective on the medieval world that takes seriously the vibrancy of matter as a vital aspect of textual culture often overlooked
