Studies in the Art of Rat-catching Henry C. Barkley,1896 **Studies in the Art of Rat-Catching** H. C.

Barkley,2016-05-03 C Barkley s little manual on rat catching and rabbit catching is from a past era when life was much simpler and our propensity to call a pest a pest was not diminished by the selective fads and niceties of modernity Most important of all it was an era when the Aristotelian idea of ends the proper conduct of a life towards a desired conclusion was of importance not just for humans but for all living things It was proper and ordained for rats to live rat centred lives doing the things rats do just as it was proper for ferrets to do the things that come natural to them And as Barkley himself indicates in his Introduction it was ordained in the great scheme of things that dogs should come to their human masters and not the other way round for this too represents a natural order in the hierarchy of being It was proper also that each human occupation should be regarded as having an intrinsic worth and the value of the trade of rat catching should be seen in no less a light than that of any other profession Indeed as Barkley hints in the book the value of a rat catcher might well be regarded in a higher light than that of your average politician who as Barkley reminds us is prone to giving speeches when Parliament is not sitting or indeed at every possible opportunity And this as Barkley tells us is why he decided on a school text book for prospective rat catchers **Studies in the Art of Rat-catching** Henry C. Art of Rat-Catching H. C. Barkley,2013-04-07 Studies in the Art of Rat Catching By H C Barkley Story of a professional rat catcher I had a struggle at first Rats full grown ones only fetched twopence each and the system adopted by farmers of letting their Pg 5 rat killing for say three pounds a year for a farm of 400 acres almost broke me but I stuck to my profession and do not regret having done so In those days and during all my active life I have had to work to live owing to the constant scarcity of rats but if I managed to make a living then what might not be done now when Nature has sent the rat to our homesteads by thousands and farmers and others are being eaten off the face of the earth by them With the modest capital of five shillings given me by my father and a mongrel terrier given me by a poacher who had to go into retirement for killing a pheasant and half killing a keeper I began my career as a but I had better give you one of my professional cards Here it is Bob Joy Studies in the Art of Rat-Catching H. C. Barkley,2014-10-30 Ever since I was a boy and ah long long before that I fancy the one great anxiety of parents of the upper and middle classes blessed with large families has been What are we to do with our boys and the cry goes on increasing being intensified by the depreciation in the value of land and by our distant colonies getting a little overstocked with young gentlemen who have been banished to them by thousands to struggle and strive sink or swim as fate wills it At home all professions are full and everything has been tried and go where you will even the children of the noble may be found wrestling with those of the middle and working classes for every piece of bread that falls in the gutter Nothing is infra dig that brings in a shilling and all has been and is being tried The sons of the great are to be found shoulder to shoulder with Tommy Atkins up behind a hansom cab keeping shops selling wines horses cigars coals

and generally endeavouring feebly to shoulder the son of the working man out of the race over the ropes Fortunately Heaven tempers the wind to the shorn lamb and I believe it has done so now I believe kind Dame Nature during the last summer has stepped in and opened out an honourable path for many gentlemen s sons that I think will be their salvation and at all events if it does not make them all rich will if they only follow it make them most useful members of society and keep them out of mischief and out of their mammas snug drawing rooms I have followed the path myself and after fifty years tramp down it have been forced to abandon it owing to gout and rheumatism I have not picked up a big fortune at it or become celebrated except quite locally but I have had a good time and helped the world in general and am content with my past life *Studies in the Art of Rat-catching* Henry C. Barkley,2022-08-01 In *Studies in the Art of Rat catching* Henry C Barkley delves into the intricate world of pest control through an insightful amalgamation of anecdotal evidence practical tips and broader ecological considerations The book adopts a narrative style that balances meticulous observation with a touch of humor reflecting the author s deep appreciation for the theme of humans coexisting with nature Set against the backdrop of early 20th century concerns regarding urban sanitary conditions the text serves as both a guide and a social commentary addressing the intersection of human activity and rodent behavior as emblematic of larger environmental issues Henry C Barkley a keen observer of his surroundings and an advocate for the practical application of naturalist principles drew from his extensive experience in urban gardening and pest management His personal encounters with infesting rodents not only shaped his understanding of ecological balance but also fueled his desire to educate the public on ethical and sustainable approaches to handling pest problems Barkley s profound curiosity about the natural world and his commitment to community well being are evident throughout the narrative This book is highly recommended for anyone interested in natural history urban ecology or the often overlooked nuances of human animal interactions Barkley s blend of scholarship and wit captivates and informs making *Studies in the Art of Rat catching* an essential read for pest control professionals and enthusiasts alike **Studies in the Art of Rat Catching - With Additional Notes on Ferrets and Ferreting, Rabbiting and Long Netting** H. C. Barkley,2012-12-03 This fascinating book was first published in London 1911 with the writer relating his experiences as a professional rat and rabbit exterminator during the late 1800s The book was written primarily as a guide to the rural art of vermin control for pupils of English public schools such as Eton Harrow and Rugby but still holds much information that modern readers will find of practical and relevant use today Despite the books title as much of the content is devoted to ferrets and rabbit control as it is to rat catching 196 pages contain 10 chapters detailing such varied subjects as Ratting Tools Ferrets and Ferreting Learning Dog Language Rabbit Catching Long Netting Ratting Days Ratting Dogs etc Although almost a century has passed since its first publication this excellent title is recommended for inclusion in the library of all true countrymen Many of the earliest sporting books particularly those dating back to the 1800s are now extremely scarce and very expensive We are republishing these classic works in affordable high quality modern editions using the original text
