**OECD Green Growth Studies Material Resources, Productivity and the Environment** OECD,2015-02-12 This book provides a factual analysis of material flows and resource productivity in OECD countries in a global context Global Material Resources Outlook to 2060 Economic Drivers and Environmental Consequences OECD,2019-02-12 This report presents global projections of materials use and their environmental consequences providing a quantitative outlook to 2060 at the global sectoral and regional levels for 61 different materials biomass resources fossil fuels metals and non metallic minerals It explains the *OECD Green Growth Studies Green Growth Indicators 2014* OECD,2014-06-24 This book updates the 2011 Towards Green Growth Monitoring progress It presents the OECD framework for monitoring progress towards green growth and a selection of updated indicators that illustrate the progress that OECD countries have made since the 1990s *OECD Green Growth Studies Green Growth Indicators 2017* OECD,2017-06-20 Policies that promote green growth need to be founded on a good understanding of the determinants of green growth and need to be supported with appropriate indicators to monitor progress This book is an update of the 2014 edition *OECD Green Growth Studies Towards Green Growth? Tracking Progress* OECD,2015-07-27 This report evaluates progress since the 2011 Green Growth Strategy and highlights where there is broad scope to heighten the ambition and effectiveness of green growth policy Monitoring Progress towards a Resource-Efficient and Circular Economy OECD,2024-06-26 Policies that foster the transition towards a more circular economy are gaining significant traction Such policies are essential for a sustainable low carbon resource efficient and competitive economy These developments bring about demands for reliable information to track progress and gauge results as well as for indicators that speak to policymakers and the public at large This report presents a conceptual framework and indicator set to monitor progress and inform circular economy policies It is designed to support OECD work on circular economy and provides a source of inspiration for countries seeking to build a coherent circular economy monitoring framework *Natural Resource Management and the Circular Economy* Robert C. Brears,2018-02-15 This book provides insight into how governments are using a variety of innovative fiscal and non fiscal instruments to develop circular economies with significant economic and environmental benefits It emphasises the urgent need for these circular economies and to move away from our current linear model that has led to environmental degradation volatility of resource prices and supply risks from uneven distribution of natural resources *Natural Resource Management and the Circular Economy* illustrates how governments have promoted the development of an economy that can provide substantial net material savings mitigate price volatility and supply risks and improve ecosystem health and long term resilience of the economy Through a series of case studies it details the various innovative policy instruments which can be utilised including regulations market based instruments incentives research and innovation support information exchanges and support for voluntary approaches The book also proposes a series of best practices for different countries both developed and developing who are

implementing their circular economy *Environment at a Glance 2020* OECD,2020-02-25 *Environment at a Glance 2020* presents a digest of major environmental trends in areas such as climate change biodiversity water resources air quality and circular economy Analysis is based on indicators from the OECD Core Set of Environmental Indicators The Green Economy and the Water-Energy-Food Nexus Robert C. Brears,2017-08-18 This book argues that a variety of policies will be required to create synergies between the water energy food nexus sectors while reducing trade offs in the development of a green economy Despite rising demand for water energy and food globally the governance of water energy food sectors has generally remained separate with limited attention placed on the interactions that exist between them Brears provides readers with a series of in depth case studies of leading cities states nations and regions of differing climates lifestyles and income levels from around the world that have implemented a variety of policy innovations to reduce water energy food nexus pressures and achieve green growth The Green Economy and the Water Energy Food Nexus will be of interest to town and regional planners resource conservation managers policymakers international companies and organisations interested in reducing water energy food nexus pressures environmental NGOs researchers graduate and undergraduate students

OECD Environmental Performance Reviews Waste Management and the Circular Economy in Selected OECD Countries Evidence from Environmental Performance Reviews OECD,2019-09-23 This report provides a cross country review of waste materials management and circular economy policies in selected OECD countries drawing on OECD s Environmental Performance Reviews during the period 2010 17 It presents the main achievements in the countries reviewed along with common **Marine Pollution, Shipping Waste and International Law** Gabriela Argüello,2019-07-22 Waste management poses increasing challenges to both the protection of the environment and to human health To face these challenges this book claims that environmental law needs to shift attention from media specific pollution regimes to integrative life cycle approaches of waste management i e from the prevention of waste generation to the actual handling of wastes Furthermore the cooperation of States and the establishment of coordinated activities is essential because states can no longer have separate standards for wastes posing transboundary risks and for purely domestic wastes Drawing upon both International and EU law the book provides a detailed analysis of the regimes set up to deal with the transboundary movement of wastes and ship source pollution so as to elucidate the obligations and legal principles governing such regimes It concludes that treaty obligations concerning transboundary movements of wastes are inapplicable to ship wastes while on board ships and on land However despite the limitations of the transboundary movement of wastes regime the principle of Environmentally Sound Management ESM embodied in this regime has gradually transformed into a legal principle ESM works to address the legal gaps in the regulation of wastes and consequently it provides the desired coherence to the legal system since it acts as a bridge between several regulatory and sectoral levels Furthermore ESM offers a new light with which to understand and interpret existing obligations and it provides a renewed impetus to regimes that directly and

indirectly govern wastes This impetus translates into greater coordination and the establishment of cross sectional policies By offering alternative ways to solve problems linked to the management of ship wastes in the sea land interface this book will appeal to anyone with an interest in International Environmental Law      **Developing the Circular Water Economy**

Robert C. Brears,2019-11-22 This book presents new research on policy innovations that promote the development of the circular water economy In contrast to the linear economy the circular water economy promotes the reduction of water consumption reuse of water and recovery of resources from wastewater to not only increase resilience to climate change but also to reduce greenhouse gas emissions resulting from the provision of water and wastewater related services Providing a series of in depth case studies of important locations in differing climates around the globe that have implemented a variety of policy innovations to develop the circular water economy this book is a valuable resource for water and resource conservation managers policymakers international companies and organisations interested in the circular economy environmental NGOs researchers as well as graduate and undergraduate students Systematically reviews policy innovations to develop the circular water economy Illustrates how leading locations from around the world have developed the circular water economy to increase resilience to climate change while reducing emissions Provides best practices for other locations around the world aiming to implement the circular water economy      Handbook of Research on Entrepreneurship
