Revolts Against Rome John S McHugh,2025-09-30

Throughout the first century AD the emperors of Rome faced various threats to their rule from ambitious or embittered nobles

However events show the Roman legionaries to be tenaciously loyal to the Julio Claudian dynasty

The murder of Nero the last of his dynasty unleashed chaos where allegiance was bought by the madness of the leading men

The troops increasingly recruited from men who had never seen Italy were often happy to draw their swords in support of a provincial governor against an emperor who was himself a victorious usurper

If successful in raising their own candidate to the purple they could expect the gratitude to be tangible and spendable

Mutinies were rare and often caused by changes to conditions of service or harsh discipline which demeaned the soldier s status and honour

This is the story of the

common soldier and their often ruthless and brutal commanders John McHugh examines each of the major cases of armed rebellion or military mutiny during the first century Skilfully intertwined with the narrative of these dramatic and usually bloody events is his analysis of the underlying causes and the varying degrees of success in the face of the Imperial response to these threats **Quarterly Journal of Indian Studies in Social Sciences** ,1970 *Strategic Review* ,1996 dedicated to the advancement and understanding of those principles and practices military and political which serve the vital security interests of the United States **Systems Development Methods for Databases, Enterprise Modeling, and Workflow Management** Wita Wojtkowski,1999 This book is a result of ISD 99 the Eighth International Conference on Information Systems Development Methods and Tools Theory and Practice held August 11 13 1999 Boise Idaho The book addresses issues facing academia and industry when specifying developing managing and improving information systems In addition to the technical content this volume includes discussions on product support and content management systems for the internet environment on a new paradigm for successful acquisition of information systems and on current pedagogical issues in systems analysis and design The Publishers' Circular and Booksellers' Record ,1925
