Radiotherapy for Head and Neck Cancers Xinyuan Chen, Minglei Kang, Jun-Lin Yi, 2025-04-10 Radiotherapy is a crucial treatment modality for head and neck cancers encompassing a range of malignancies in the upper aerodigestive tract Advanced approaches such as intensity modulated radiation therapy IMRT and particle therapy with the emergence of image guided radiation therapy IGRT techniques offer enhanced precision and improved outcomes Encouragingly combining radiotherapy with chemotherapy has shown promising results in locally advanced cases However the proximity of tumors to critical structures remains challenging to manage acute and late toxicities which demands innovative strategies to reduce radiation related side effects Addressing long term toxicities is an essential research focus

with efforts toward adaptive radiotherapy radioprotective agents and other novel treatment techniques These endeavors aim to mitigate radiation induced fibrosis dysphagia dysphonia and secondary malignancies thereby enhancing patients quality of life Moreover advances in multimodal imaging techniques including computed tomography CT magnetic resonance imaging MRI positron emission tomography PET and onboard volumetric image systems have facilitated treatment planning target delineation and response assessment during and after radiotherapy Thus radiotherapy continues to be an integral component in head and neck cancer treatment and ongoing research efforts are directed toward overcoming challenges related to precision toxicities and long term outcomes

Biostimulants in Plant Protection and Performance Azamal Husen,2024-03-16 Biostimulants a diverse class of compounds including substances or microorganisms are helpful in sustainable plants growth and development They accelerate plant growth yield and chemical composition even under unfavorable conditions The main biostimulants are nitrogen containing compounds humic materials some specific compounds released by microbes plants and animals various seaweed extracts bio based nanomaterials phosphite silicon and so on Additionally new generation products and bioproducts are being developed for sustainable plant growth and protection Some research works in the area of biotechnology and nanobiotechnology have shown improved sustainable plant growth and production The protective roles of biostimulants are varied depends on the compound and plant species Exposure of biostimulants have shown accelerated plants growth and developmental processes for instance manage stomatal conductance and rate of transpiration and increase rate of photosynthesis etc They also increased crop plants immune systems against the adverse situation Thus use of innovations of new generation biostimulants also enhance plant production systems through a significant reduction of synthetic chemicals such as pesticides and fertilizers Moreover bioinoculants commercial products obtained from seaweed extract humic acids amino acids fulvic acids and some microbial inoculants have shown their potential role in adventitious root induction in plants Microbial inoculants or microbial based biostimulants as a promising and eco friendly technology can be widely used to address environmental concerns and fulfill the need for developing sustainable or modern agriculture practices They have great potential to elicit plant tolerance to various climate change related stresses and thus enhance plant growth and overall performance related features However for successful implementation biostimulants based agriculture in the field under changing climate conditions an understanding of plant functions and biostimulants interaction or action mechanisms coping with various abiotic as well as biotic stresses at the physicochemical metabolic and molecular levels is required Mycorrhizae are beneficial fungi that form symbiotic associations with plants and aid in plant development disease resistance and soil health is well established Similarly phyllospheric microbiome are known to possess different plant growth promotion attributes like nitrogen fixation phosphate solubilization biocontrol activity and increase plant resistance towards abiotic stresses The plant growth promotion traits possessed by these phyllospheric microbiota can be judiciously harbored for phyllospheric and rhizospheric engineering The engineered

phyllospheric and rhizospheric microbiome can increase the plant growth and productivity thereby can act as a driving force for increasing the agricultural production in a sustainable manner Taken together this book aims to contribute to the recent understanding associated with the various role and application of biostimulants on different plant for their sustainable growth and management Discusses our current understanding of and advances in biostimulants along with their application in plants growth performance and overall management Explores new techniques new generation products and bioproducts Highlights the role of seaweed extract humic acids protein hydrolysates amino acids melatonin paramylon fulvic acids microbial inoculants phyllospheric and rhizospheric and more Medical Law Concentrate Jo Samanta,Ash

Samanta,2018-08-02 The Medical Law Concentrate is written and designed to help you succeed Written by experts and covering all key topics Concentrate guides help focus your revision and maximise your exam performance Each guide includes revision tips advice on how to achieve extra marks and a thorough and focused breakdown of the key topics and cases Revision guides you can rely on trusted by lecturers loved by students I have always used OUP revision and Q A books and genuinely believe they have helped me get better grades Anthony Poole law student Swansea University The detail in this revision textbook is phenomenal and is just what is needed to push your exam preparation to the next level Stephanie Lomas law student University of Central Lancashire It is a little more in depth than other revision guides and also has clear diagrams and teaches ways to obtain extra marks These features make it unique Godwin Tan law student University College London The concentrate revision guides stand out against other revision guides Renae Haynes Williams law student Bangor University The exam style questions are brilliant and the series is very detailed prepares you well Frances Easton law student University of Birmingham The accompanying website for Concentrate is the most impressive I ve come across Alice Munnelly law student Kings College London it is a fantastic book It covers absolutely all topics you need for the course Emma McGeorge law student Strathclyde University Cloherty and Stark's Manual of Neonatal Care Anne R. Hansen,Ann R.

Stark,Eric C. Eichenwald,Camilla R. Martin,2022-09-01 Practical informative and easy to read Cloherty and Stark s Manual of Neonatal Care 9th Edition offers an up to date approach to the diagnosis and medical management of routine and complex conditions encountered in the newborn Written by expert authors from major neonatology programs across the U S and edited by Drs Eric C Eichenwald Anne R Hansen Camilia R Martin and Ann R Stark this popular manual has been fully updated to reflect recent advances in the field providing NICU physicians neonatal perinatal fellows residents and neonatal nurse practitioners with quick access to key clinical information **Legal Protection for Computer-Implemented**

Inventions Sabine Kruspig,Claudia Schwarz,2016-04-24 As a result of the incorporation of computer software into countless commercial and industrial products the patentability of software has become a vital issue in intellectual property law This indispensable book provides an overview on the current status of computer implemented inventions in patent law across Europe and major jurisdictions worldwide A hugely practical field research tool with guidance based on case law it examines

the major hurdles in each particular country and describes the best practice to be adopted Clearly showing how enforceable software patent applications can be competitively drafted and how a patent portfolio for computer implemented inventions can be established in several countries without spending money unnecessarily on problematic examination proceedings this book covers such issues and topics as the following claim categories for patent applications sufficient level of abstraction breadth of the claimed invention fundamental terms of computing and terminological traps probability for patents dependent on software application areas and patents in core areas of computing With separate chapters for the key countries Germany the United Kingdom France the United States China Korea Japan India and the European Patent Office the legal situation for computer implemented inventions in each country or region this book includes guidance on prosecution under national law analyses of relevant court decisions practice checklists and an outlook on future developments The authors describe claim formulation based on actual cases and on principles of computer science in order to show what might be or might not be patentable in each jurisdiction With this incomparable resource patent attorneys and patent professionals in companies will get a basis for making decisions about the most appropriate jurisdictions in which to file patent applications This book will also be of great value to computer professionals who are affected by the protection of software or who are actively involved in the protection of software by patent law
