4-1**Study Guide and Intervention****Graphing Equations in Slope-Intercept Form****Slope-Intercept Form****Slope-Intercept Form** $y = mx + b$, where m is the given slope and b is the y -intercept**Example 1**Write an equation in slope-intercept form for the line with a slope of -4 and a y -intercept of 3 .

$y = mx + b$

Slope-intercept form

$y = -4x + 3$

Replace m with -4 and b with 3 .**Example 2**Graph $3x - 4y = 8$.

$3x - 4y = 8$

Original equation

$-4y = -3x + 8$

Subtract $3x$ from each side.

$\frac{-4y}{-4} = \frac{-3x + 8}{-4}$

Divide each side by -4 .

$y = \frac{3}{4}x - 2$

Simplify.

The y -intercept of $y = \frac{3}{4}x - 2$ is -2 and the slope is $\frac{3}{4}$. So graph the point $(0, -2)$. From this point, move up 3 units and right 4 units. Draw a line passing through both points.

ExercisesWrite an equation of a line in slope-intercept form with the given slope and y -intercept.

1. slope: 8 , y -intercept -3

2. slope: -2 , y -intercept -1

3. slope: -1 , y -intercept -7

Write an equation in slope-intercept form for each graph shown.

$y = 2x - 2$

Graph each equation.

7. $y = 2x + 1$

$y = 2x + 1$

$y = -x + 3$

8. $y = -3x + 2$

$y = -3x + 2$

$y = \frac{3}{4}x - 5$

9. $y = -x - 1$

$y = -x - 1$

Handbook of Behavioral and Cognitive Therapies with Older Adults Dolores Gallagher Thompson, Ann Steffen, Larry W. Thompson, 2007-10-12 It gives me great pleasure to witness continued growth in the application of cognitive and behavioral theories and therapies to more diverse populations including in this volume their application to the mental health problems of later life Evidence continues to accumulate demonstrating that these are effective in treating a broad range of elderly patient groups This is the first book to examine a number of these evidence based interventions currently in use with older adults The editors have assembled chapters developed in many of the leading clinical and clinical research

programs focusing on elderly patients both in this country and in the UK Since the emphasis of this volume is primarily on clinical application each author group was asked to discuss the empirical data for the treatment strategies it is using with the specific patient group selected Typically this was followed by a detailed description of treatment procedures that were then illustrated by one or more clinical examples The book begins by examining the treatment of depressive and anxiety disorders and then moves on to more complicated and/or serious disorders including schizophrenia and other psychoses suicidal behavior personality disorders bipolar disorders dementia and complicated bereavement A chapter on the problems and issues in training therapists to use evidence based interventions effectively is also included along with a chapter discussing the implications of Medicare policies and guidelines for service delivery
