 Teachers cannot teach what they do not know This country has tolerated a weak licensing system for prospective teachers for
 decades This weak system has been accompanied by an increasingly emptier curriculum for most students depriving them of
 the knowledge and skills needed for self government An Empty Curriculum How Teacher Licensure Tests Lead to Empty
 Student Minds makes the case that the complete revision of the licensing system for prospective and veteran teachers in
 Massachusetts in 2000 and the construction of new or more demanding teacher licensing tests contributed significantly to
 the Massachusetts education miracle That miracle consisted of enduring gains in achievement for students in all
 demographic groups and in all regional vocational technical high schools since 2005 gains confirmed by tests independent of
 Massachusetts policy makers The immediate purpose of this book is to explain what Massachusetts did in 2000 to strengthen
 its teacher licensing and re licensing system to ensure that all teachers could teach to relatively strong K 12 standards Its
 larger purpose is to suggest that development of strong academic standards in all major subjects should be followed by
 complete revision of a state s teacher licensing system not as has been the case for several decades the development of K 12
 student tests if this country wants to strengthen public education **Nmta 102 Elementary Education Subtests I**
