Derome, 2013-10-22 Presents an introduction to modern NMR methods at a level suited to organic and inorganic chemists engaged in the solution of structural and mechanistic problems The book assumes familiarity only with the simple use of proton and carbon spectra as sources of structural information and describes the advantages of pulse and Fourier transform spectroscopy which form the basis of all modern NMR experiments Discussion of key experiments is illustrated by numerous examples of the solutions to real problems The emphasis throughout is on the practical side of NMR and the book will be of great use to chemists engaged in both academic and industrial research who wish to realise the full possibilities of the new wave NMR **Radioisotope Sample Measurement Techniques in Medicine and Biology**, 1965 *Techniques of Chemistry*, 1970 **From Berkeley to Berlin** Tom Francis Ramos, 2022-02-15 In November 1960

bolstered by anti Communist ideologies John F Kennedy was elected president of the United States Soviet premier Nikita Khrushchev brandished nuclear diplomacy to force the United States to abandon Berlin setting the stage for a major nuclear confrontation over the fate of West Berlin From Berkeley to Berlin explores how the United States had the wherewithal to stand up to Khrushchev's attempts to expand Soviet influence around the globe The story begins when a South Dakotan Ernest Lawrence the grandson of Norwegian immigrants created a laboratory on the Berkeley campus of the University of California The Rad Lab attracted some of the finest talent in America to pursue careers in nuclear physics including J Robert Oppenheimer who collaborated closely with Lawrence for more than a decade culminating in their work together on the Manhattan Project When it was discovered that Nazi Germany had the means to build an atomic bomb Lawrence threw all his energy into waking up the American government to act Ten years later when Joseph Stalin's Soviet Union became a nuclear power Lawrence drove his students to take on the challenge to deter a Communist despot's military ambitions Their journey was not easy they had to overcome ridicule over three successive failures which led to calls to see them and their laboratory shut down At the Nobska Conference in 1956 the Rad Lab physicists took up the daunting challenge to provide the Navy with a warhead for Polaris The success of the Polaris missile which could be carried by submarines was a critical step in establishing nuclear deterrent capability and helped Kennedy stare down Khrushchev during the Berlin Crisis of 1961 Six

months after the height of that crisis Kennedy thought about how close the country had come to destruction and he flew out to Berkeley to meet and thank a small group of Rad Lab physicists for helping the country avert a nuclear war     *Atomic Energy Research, Life and Physical Sciences, Reactor Development, Waste Management, 1961, Special Report* U.S. Atomic Energy Commission, 1962     **Atomic Energy Research** U.S. Atomic Energy Commission.
