Number Bonds To 10 Picture:

The Fear of Maths Steve Chinn, 2011-09-01 Maths is an essential skill but many people fear that they will never pick up the maths that they failed to understand in school Don't worry Most people know more maths than they realise Steve Chinn is your guide to understanding the basic facts of maths as you will use it in daily life There are many reasons why the inability to do maths affects so many children and follows them into adulthood and it has little to do with intelligence The major reason is anxiety the best way to overcome that anxiety is to build on existing knowledge Everyone has some maths skills and knowledge that can be extended to many more skills and knowledge The Fear of Maths How to Overcome It is for parents and teachers looking for a way to encourage and help their children It is based on teaching maths as a set of principles rather than a series of facts to be memorised to be understood and how they can be used in various situations to make numbers seem less threatening and perhaps for the first time to begin to make sense Numbers are integral to everyday life from checking the cost of shopping and understanding a train timetable to calculating the best value mobile phone deal and Steve Chinn brings maths into everyday life Providing a solid foundation The Fear of Maths How to Overcome It will inspire the confidence that will make learning maths easier
