*The young nurse returned to room seven. Finishing up her charting just a moment earlier, she glanced at her watch and knew she couldn't postpone going into his room any longer, despite the disconcerting vibe she got each time she went in there.*

*Room seven was still dark and the patient was still grinning. Glasses were still cloudy and eyes were still staring. Scanning the room, the young nurse realized that she and the doctor had left the place in shambles in their rush to escape. As she started to gather the waste, she noted a capped, pink syringe, the 20-gauger from the failed attempt [at IV insertion] earlier. The young nurse inwardly groaned. Had her manager made it in there before her, she would have never heard the end of it: You left a needle within reach of an encephalopathic patient?? What were you thinking?!*

*Well, she certainly was thinking now. She picked up the needle and felt a stab.*

**Skill and Education: Reflection and Experience** Bo Göransson, Magnus Florin, 2012-12-06 This book has an important starting point in the conference held in Stockholm in May/June 1988 on Culture, Language and Artificial Intelligence. It assembled more than 300 researchers and practitioners in the fields of technology, philosophy, history of ideas, literature, linguistics, social science etc. The conference was an initiative from the Swedish Center for Working Life based on the project AI Based Systems and the Future of Language, Knowledge and Responsibility in Professions within the COST 13 programme of the European Commission. Participants in the conference and researchers related to its aims were chosen to contribute to this book. It is preceded by *Knowledge, Skill and Artificial Intelligence* ed. B. Göransson and I. Josefson, Springer Verlag 1988, *Artificial Intelligence, Culture and Language* ed. B. Göransson and M. Florin, Springer Verlag 1990 and *Dialogue and Technology, Art and Knowledge* ed. B. Göransson and M. Florin, Springer Verlag 1991. The two latter books have the same conference connection as this one and their aim is to present the contours of a research field with a multitude of issues that demands thorough investigation. The contributors' thinking in this field varies greatly so do their styles of writing. For example, contributors have varied in their choice of he or she for the third person. No distinction is intended but chapters have been left with the original usage to avoid extensive changes. Similarly, individual contributors' preference as to notes or reference lists have been followed.
