education and during the last decade there has been a growth in international comparative VET research. While the Nordic countries provide an ideal case for comparative education studies, the literature in English on the Nordic VET systems is at present very limited. This book provides thorough examinations of VET in Sweden, Denmark, Norway, and Finland. Each section examines the current challenges for VET, compares how these challenges are managed, and explores recent reforms and institutional innovations. Contributors also analyse institutions and policies at the national level and include comparative studies of two occupations at the micro level in the four countries. The book explores what can be learned from the diversity of the VET systems in the Nordic countries, which otherwise have many similarities and share a common heritage in education policy. This volume will help strengthen the knowledge base required for transnational policy learning and for developing vocational education internationally for the future. As a result, the book will be of interest to researchers, academics, and postgraduate students involved in the study of vocational education, educational studies, and educational policy, as well as policy makers.

Gerontological Nursing Competencies for Care Kristen L. Mauk, 2017-04-14. Gerontological Nursing Competencies for Care, Fourth Edition, focuses on caring for the elderly by employing a holistic and interdisciplinary approach. The Fourth Edition will feature a greater emphasis on healthy aging and continues to follow the framework of the Core Competencies of the American Association of Colleges of Nursing (AACN) and the John A. Hartford Foundation Institute for Geriatric Nursing. Important Notice: The digital edition of this book is missing some of the images or content found in the physical edition.

Nurses and Nursing Pádraig Ó Lúanaigh, 2017-04-21. This textbook draws on international contributors with a range of backgrounds to explore, engage with, and challenge readers in understanding the many aspects and elements that inform and influence contemporary nursing practice. With a focus to the future, this book explores the challenges facing health services and presents the arguments for a nursing contribution and influence in ensuring safe and quality care. Readers are supported to explore how, as individuals, they can shape their personal nursing identity and practice. The structure of the text is based on the belief that an individual nurse's professional identity is developed through an interaction between their personal attributes and the influences of the profession itself. Reflecting this approach, the authors engage in a conversation with the reader rather than simply presenting a series of facts and information. Organised around a series of topical and pertinent questions and drawing on perspectives from policy, education, and practice, the book explores a diverse range of topics such as how historical and popular media representations of nursing hold back nursing practice today, the opportunities presented through education and nursing role development to increase the nursing contribution to health services, the economic and political influences on nursing and health care, how the professional regulation of nurses and core values informs your practice, ways to define and develop your own strong nursing identity. Central chapter questions provide

ideal triggers for group discussions in class or online and equally as discussion topics between colleagues to support ongoing professional development There is an emphasis throughout Nurses and Nursing on challenging thinking to recast nursing practice for the future by encouraging the reader to explore and create their emerging nursing identity or re examine previously long held views This text supports the reader to better understand health care nursing and most importantly themselves as nurses
