but placed many of them in situations of economic insecurity This was a particular concern of the Womens Movement in its early decades and their first response was a redefinition of femininity and the promotion of academic education for girls The author demonstrates that as a result of these efforts employers in the areas targeted began to see the advantages of employing young women and young women were persuaded that working outside the home would not endanger their femininity     **Federal Register** ,1978-12     *The Churchman* ,1892
