*Nurturing Science-based Ventures* Ralf W. Seifert, Benoît F. Leleux, Christopher L. Tucci, 2008-01-25 Few would deny that small entrepreneurial firms play an important economic and social role Not only do they generate a significant number of jobs but they also contribute a large proportion of gross national product GNP Not all small firms qualify as entrepreneurial entities however While small refers mostly to size entrepreneurial refers to growth and a value creation orientation The vast majority of small firms have no growth aspirations nor do they have the means and skills to grow As such they may still provide employment and local value but would not embrace the high potential aspirations of entrepreneurial ventures This book clearly addresses those entrepreneurs who are interested in leading hi growth potential companies Table 1 Table 1 Growth Typology of Small Firms 1 Type of venture Desired sales range Future employees Lifestyle 0 to 1 million 0 to 4 Smaller high potential 1 million to 20 million 5 to 50 High potential over 20 million Over 50 High innovation technology based startups assume a very special role in hi growth entrepreneurship Although these startups constitute a comparatively low number of small businesses they produce proportionately far more jobs than their low and medium innovation counterparts The aim of achieving rapid growth is typically referred to as high expectation entrepreneurship An area of major concern to us is a fact revealed in the latest GEM report The rate of European hi expectation entrepreneurial activity is among the lowest in the world
