

Study Guide:

I. Plate Boundaries

1. Divergent Boundaries

- **Definition:** Plates move apart from each other.
- **Key Features:**
 - Formation of new crust as magma rises to the surface.
 - Occurs primarily at mid-ocean ridges, leading to **sea-floor spreading**.
- **Examples:** Mid-Atlantic Ridge.
- **Associated Landforms:** Rift valleys, mid-ocean ridges.
- **Natural Phenomena:** Minor earthquakes, volcanic activity.

2. Convergent Boundaries

- **Definition:** Plates move towards each other.
- **Key Features:**
 - **Oceanic-continental:** Denser oceanic plate subducts, forming volcanic arcs and deep trenches.
 - **Oceanic-oceanic:** One oceanic plate subducts, forming a volcanic island arc.
 - **Continental-continental:** Plates collide, creating large mountain ranges.
- **Examples:** The Himalayas (continental-continental), Mariana Trench (oceanic-oceanic).
- **Associated Landforms:** Mountain ranges, deep-sea trenches, volcanic arcs.
- **Natural Phenomena:** Earthquakes, volcanic eruptions.

3. Transform Boundaries

- **Definition:** Plates slide horizontally past one another.
- **Key Features:**
 - No crust is created or destroyed.
 - High levels of seismic activity due to friction between plates.
- **Examples:** San Andreas Fault, California.
- **Associated Landforms:** Fault lines.
- **Natural Phenomena:** Earthquakes.

II. Key Processes

1. Earthquakes

- Occur primarily along **transform and convergent boundaries**.
- Caused by the build-up and release of stress as plates move past each other.
- **Transform boundaries** (like the San Andreas Fault) are particularly prone to frequent and strong earthquakes.

2. Volcanic Activity

- Mostly associated with **convergent boundaries** where subduction occurs.
- Magma rises to the surface when one plate is forced below another, resulting in volcanic eruptions.
- **Volcanic island arcs** form in **oceanic-oceanic convergent zones** (e.g., Japan).

3. Mountain Building

- Occurs at **continental-continental convergent boundaries** where plates of similar density collide, pushing up the Earth's crust to form mountains (e.g., the Himalayas).
