**The Devil Made Me Do It** Nicky Falkof, 2025-08-01 South Africa can sometimes appear to be awash with occult crime From satanist conspiracies and witchcraft accusations to muti murders and demonic possession a trawl through our national news suggests a society at war with the forces of evil Why does the occult have such a grasp on our collective imagination In this vastly unequal country with its crises of gender based violence child abuse poverty and unemployment there are more than enough obvious dangers to our social stability Why then are South Africans so quick to blame the supernatural for violence and misfortune How do beliefs in occult crime intersect with problems of gender race and class And is there any truth to these supernatural tales The Devil Made Me Do It examines these and other thorny questions by probing the stories beliefs and

rumours behind the so called occult crimes that have entranced South Africa's fractured psyche. They include the murder of a child mistaken for a tokoloshe in the 1920s, the satanic panic that gripped the nation in the 1980s and 1990s, the Krugersdorp cult killings of 2012/16 and the muti murder of a six year old girl in 2022. What can these crimes and the way they are represented by media, police and other institutions tell us about South Africa today? *Heavy Metals* Hosam El-Din M. Saleh, Refaat Aglan, 2018-06-27

Fundamental societal changes resulted from the necessity of people to get organized in mining, transporting, processing and circulating the heavy metals and their follow up products which in consequence resulted in a differentiation of society into diversified professions and even societal strata. Heavy metals are highly demanded technological materials which drive welfare and progress of the human society and often play essential metabolic roles. However, their eminent toxicity challenges the field of chemistry, physics, engineering, cleaner production, electronics, metabolomics, botany, biotechnology and microbiology in an interdisciplinary and cross sectorial manner. Today all these scientific disciplines are called to dedicate their efforts in a synergistic way to avoid exposure of heavy metals into the eco and biosphere, to reliably monitor and quantify heavy metal contamination and to foster the development of novel strategies to remediate damage caused by heavy metals. **Digital Work and the Platform Economy** Seppo Poutanen, Anne Kovalainen, Petri Rouvinen, 2019-11-28
