The inspiring story of the high impact tutoring movement and its revitalization of the post pandemic classroom. Public education isn't a sector known for quick change but the COVID 19 pandemic turned schools into labs of innovation nationwide. By the pandemic's end, a remarkable number of K-12 classrooms had come to embrace tutoring, particularly high impact tutoring and its adaptable design. In *The Future of Tutoring*, Liz Cohen looks back at a unique revolution and finds that with effective buy-in and thoughtful implementation, tutoring programs can improve academic performance for all students. Within a year into the pandemic, 10,000 US school districts were offering some sort of tutoring initiative after years of almost none. The lessons learned are vast. Traveling to Ohio, Louisiana, Maryland, New York, North Carolina, Texas, Virginia, and Washington DC, Cohen covers the ups and downs of this massive shift with a special focus on high impact tutoring in which a small group of students work consistently with an adult at least three days a week. Whether the instruction was in person or virtual, performed by district staff or college students, or focused on math or reading, this renewed investment in the student-tutor relationship helped educators design curricula around students' specific needs and motivators with measurable results. Cohen tells an inspiring story of administrators, practitioners, and state leaders all staking their reputations on a bold intervention. As leaders struggle with how to combat students' learning loss, *The Future of Tutoring* shows where resources can make a real difference. *The PLC Dashboard* Brig Leane, 2025-05-06.
