Pasqualetti,2021-12-03 Energy weaves the tapestry of our lives and it does so in more ways than

we usually recognize While it is clear that it powers our homes airplanes and factories its overwhelming influence often goes without notice in other areas from the heartbreak of poverty to the motivation for war While maintaining its availability has the potential to create jobs and contribute to competitive economies nonrenewable energy sources are scarring our landscapes polluting our air and fouling our water Understanding how we use energy and what we are willing to do to maintain our access to it can help us prepare for the complex and daunting challenges that linger as we look for alternatives

In *The Thread of Energy* Martin J Pasqualetti homes in on this vital driver of human actions and decisions He exposes the impact of energy according to multiple scales of measurement and assessment from everyday applications to global entanglements The book traces our increasing dependence on Earth s nonrenewable energy resources by comparing lifestyle changes throughout history Pasqualetti showcases the many ways energy infiltrates communication methods in all its forms e g print visuals digital etc The final chapters detail various approaches used by democratic societies looking to lessen their energy usage including the critical importance of environmentally conscious policymakers *The Thread of Energy* treats energy as a social issue with a technical component rather than the other way around

**The Lewiston Shootings** Robert Conlin, 2024-07-30 Never again would anyone say It will never happen here Because it did October 25 2023 was just an ordinary night in Lewiston a small working class city of 37 000 in central Maine Friends and families had gathered to do what they loved to do with the people they wanted to be with at a bowling alley called Just in Time Recreation Center and Schemengees a popular sports bar and restaurant They felt immune from the violent crime that seemed to wrack the rest of the country in a state that the FBI had just named the safest in America Then Robert Card II a deeply paranoid Army Reserve soldier walked into both places with a high powered rifle and opened fire killing 18 people and wounding 13 more He then fled to a third location where according to the evidence and the testimony of his best friend he likely planned to lay in wait and kill his ex co workers when they came to work the next morning The tragedy is that the numerous red flags he had raised in the months before weren t enough to stop him before he carried out his terrible plan A combination of watered down gun control laws and law enforcement and military negligence made sure of that

In *THE LEWISTON SHOOTINGS* An All American Tragedy author and award winning journalist Robert Conlin traces the shootings that deeply scarred a community that thought it was the last place on earth where a mass shooting would take place

rotational kinematics just like linear kinematics is descriptive and does not represent laws of nature with kinematics we can describe many things to great precision but kinematics does not consider causes for example a large angular acceleration describes a very rapid change in angular velocity without any consideration of its cause

evaluate problem solving strategies for rotational kinematics just by using our intuition we can begin to see how rotational quantities like  $\theta$ ,  $\omega$  and  $\alpha$  are related to one another for example if a motorcycle wheel has a large angular acceleration for a fairly long time it ends up spinning rapidly and rotates through many revolutions
